Revision: 24 March 2023 Version: 007

FUEL OIL, RESIDUAL V2006

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

### SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1	Product identifier	
	Product name	Fuel oil, residual
	Product description	V2006-HIGH SULPHUR FUEL OIL-Fuel oil, residual
	Trade Name	HIGH SULPHUR FUEL OIL
	Product code	HSFO, V2006
	CAS No.	68476-33-5
	EC No.	270-675-6
	REACH Registration No.	01-2119474894-22-xxxx
	-	

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against Identified use(s)

NoExposure ScenarioPage:1Distribution of Fuel oil, residual122Formulation and (re)packing of Fuel oil, residual163Use as a fuel (Industrial)204Use as a fuel (Professional)24

Uses advised against

Anything other than the above.

Vitol SA

### SECTION 2: HAZARDS IDENTIFICATION

re

2.1.1 Regulation (EC) No. 1272/2008 (CLP)

Asp. Tox. 1; H304 Acute Tox. 4; H332 Carc. 1B; H350 Repr. 2; H361d STOT RE 2; H373 (Thymus, Liver, Blood effects) Aquatic Acute 1; H400 Aquatic Chronic 1; H410

2.2 Label elements Product description

Hazard Pictogram(s)

Signal Word(s)

Hazard Statement(s)

According to Regulation (EC) No. 1272/2008 (CLP) V2006-HIGH SULPHUR FUEL OIL-Fuel oil, residual

DANGER

H304: May be fatal if swallowed and enters airways. H332: Harmful if inhaled.

Revision: 24 March 2023 Version: 007

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

		H350: May cause cancer. H361d: Suspected of damaging the unborn child. H373: May cause damage to organs through prolonged or repeated exposure: Thymus, Liver, Blood effects H410: Very toxic to aquatic life with long lasting effects.
	Precautionary Statement(s)	<ul> <li>P201: Obtain special instructions before use.</li> <li>P260: Do not breathe dust/fume/gas/mist/vapours/spray.</li> <li>P273: Avoid release to the environment.</li> <li>P280: Wear protective gloves/protective clothing/eye protection/face protection.</li> <li>P301+P310: IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.</li> <li>P331: Do NOT induce vomiting.</li> </ul>
	Supplemental information	EUH066: Repeated exposure may cause skin dryness or cracking.
3	Other hazards	Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances. Vapour may create explosive atmosphere. The vapour is heavier than air; beware of pits and confined spaces.

### SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

#### 3.1 Substances

SUBSTANCE	CAS No.	EC No.	%W/W
Fuel oil, residual	68476-33-5	270-675-6	100

### **SECTION 4: FIRST AID MEASURES**

2.3

4.1	Description of first aid measures	
	Self-protection of the first aider	The vapour is heavier than air; beware of pits and confined spaces. If it is suspected that fumes are still present, the responder should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Avoid all contact. Do not ingest. If swallowed then seek immediate medical assistance.
	H2S Warning:	Hydrogen sulphide (H2S) can accumulate in the headspace of storage tanks and reach potentially hazardous concentrations.
		If there is any suspicion of inhalation: A self contained breathing apparatus should be worn. Remove to fresh air immediately.
	Inhalation	IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. If symptoms persist, obtain medical attention.
	Skin contact	IF ON SKIN (or hair): Remove contaminated clothing immediately and wash affected skin with plenty of water or soap and water. If irritation (redness, rash, blistering) develops, get medical attention.
	Eye contact	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice/attention.
	Ingestion	IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the lungs. If vomiting occurs spontaneously, keep head below hips to prevent aspiration. If unconscious, place in recovery position and get medical attention

Revision: 24 March 2023 Version: 007

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

- 4.2 Most important symptoms and effects, both acute and delayed
- 4.3 Indication of any immediate medical attention and special treatment needed

Notes to a physician:

immediately. Do not give anything by mouth to an unconscious person. Get medical attention immediately. Do not wait for symptoms to appear.

Vapour may be irritant to the respiratory tract. Repeated and/or prolonged skin contact may cause irritation. May cause eye irritation. Aspiration into the lungs may cause chemical pneumonitis, which can be fatal.

If breathing is laboured, oxygen should be administered by qualified personnel. In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).

IF INHALED: If unconscious, place in recovery position and get medical attention immediately. Administer oxygen if available and artificial respiration if necessary. IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the lungs. If aspiration is suspected obtain immediate medical attention. If vomiting occurs spontaneously, keep head below hips to prevent aspiration into the lungs.

#### SECTION 5: FIREFIGHTING MEASURES

5.1 Extinguishing media Suitable extinguishing media Unsuitable extinguishing media

5.2 Special hazards arising from the substance or mixture Foam, Carbon dioxide, Water fog or dry powder.

Do not use water jet. Direct water jet may spread the fire.

Not flammable but will support combustion. The vapour is heavier than air; beware of pits and confined spaces. Will float and can be reignited on surface water. Decomposes in a fire giving off toxic fumes: A mixture of solid and liquid particulates and gases including unidentified organic and inorganic compounds. If sulphur compounds are present in appreciable amounts, combustion products may include also H2S and SOx (sulfur oxides) or sulfuric acid.

5.3 Advice for firefighters

Fight fire with normal precautions from a reasonable distance. Fire fighters should wear complete protective clothing including self-contained breathing apparatus. Keep containers cool by spraying with water if exposed to fire. Avoid release to the environment. Dike fire control water for later disposal.

### SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1	Personal precautions, protective equipment and emergency procedures	Caution - spillages may be slippery. Ensure operatives are trained to minimise exposures. Ensure suitable personal protection during removal of spillages. Eliminate sources of ignition. Shut off leaks if without risk. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid all contact with substance. Ensure adequate ventilation. Do not breathe vapour. Do not ingest. If swallowed then seek immediate medical assistance. Do not use sparking tools.
	H2S Warning:	Product may release Hydrogen Sulphide. Exposure controls - These controls may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H2S alarms, Personal H2S alarms, Personal escape sets, H2S awareness training. Please see section 8 for appropriate personal protection equipment.
	Small spillages:	Wear flame-resistant antistatic protective clothing.
	Large spillages:	Evacuate the area and keep personnel upwind. Drench contaminated clothing with water before removing to avoid risk of sparks from static electricity. Avoid all contact. Wear chemical protection suit and breathing apparatus. See Also Section: 8
6.2	Environmental precautions	Avoid release to the environment. Do not allow to enter drains, sewers or watercourses. Spillages or uncontrolled discharges into watercourses must be alerted to the Environment Agency or other appropriate regulatory body. If necessary: Dike area to contain the spill and prevent releases to sewers, drains, or other waterways.
6.3	Methods and material for containment and cleaning up	Provided it is safe to do so, isolate the source of the leak. The vapour is heavier than air; beware of pits and confined spaces. Ensure that the equipment is adequately grounded. Allow small spillages to evaporate provided there is adequate ventilation.

Revision: 24 March 2023 Version: 007

# UEL OIL RESIDUAL V2006

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878		
Spillages onto land:	In case of soil contamination, remove contaminated soil and treat in accordance with local regulations. Adsorb spillages onto sand, earth or any suitable adsorbent material. Transfer to a lidded container for disposal or recovery. Dispose of this material and its container as hazardous waste. <b>Small spillages:</b> Allow small spillages to evaporate provided there is adequate ventilation. Wear flame-resistant antistatic protective clothing.	
	Large spillages: Cover spillage with foam to reduce evaporation. Do not use water jet.	
Spillages on water or at sea:	Collect as much as possible in clean container for reuse or disposal. <b>Small spillages:</b> Contain product with floating barriers or other equipment. Collect spilled product by absorbing with specific floating absorbents. <b>Large spillages:</b> Open waters should be contained with floating barriers or other mechanical means and recovered, only if this is strictly necessary. Otherwise control the spreading of the spillage, and let the substance evaporate naturally.	
6.4 Reference to other sections	See Section: 8,13	

#### SECTION 7: HANDLING AND STORAGE 7.1 Precautions for safe handling Obtain special instructions before use. Keep away from sources of ignition. - No smoking. Use only outdoors or in a well-ventilated area. Prevent vapour build up by providing adequate ventilation during and after use. Take action to prevent static discharges. Use non-sparking tools. All parts of the plant and equipment should be electrically bonded together and connected to earth. Electrical continuity should be checked at regular intervals. Antistatic clothing and footwear should be used. The vapour is heavier than air; beware of pits and confined spaces. Avoid all contact with substance. Do not ingest. If swallowed then seek immediate medical assistance. Do not breathe vapour. See Section: 8. Keep good industrial hygiene. Wash hands thoroughly after handling. Contaminated clothing should be thoroughly cleaned. H2S Warning: Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances. These controls may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H2S alarms, Personal H2S alarms, Personal escape sets, H2S awareness training. 7.2 Conditions for safe storage, including any Light hydrocarbon vapours can build up in the headspace of containers. These incompatibilities can cause flammability / explosion hazards. Bund storage facilities to prevent soil and water pollution in the event of spillage. Keep only in original packaging. Keep containers properly sealed when not in use. Protect from sunlight. Containers of this material may be hazardous when empty since they retain product residue. Empty container may contain product residue which may result in flammable or explosive vapours inside the container. Storage temperature Stable at ambient temperatures. Storage measures Suitable containers: Mild steel, Stainless steel. Unsuitable containers: Synthetic materials Incompatible materials Keep away from oxidising agents. Strong acids and Alkalis. 7.3 Specific end use(s) See Section: 1.2 and/or Exposure Scenario

### SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 8.1.1	Control parameters Occupational exposure limits	Not established
8.1.2	Biological limit value	Not established
8.1.3	PNECs and DNELs	PNEC: Fuel Oil, Residual is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the

Revision: 24 March 2023 Version: 007

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Fuel Oil, Residual Derived No-Effect Level	Oral	Inhalation	Dermal
Worker - Long Term - Systemic effects	0.015 mg/kg bw/day	0.015 mg/kg bw/day	0.015 mg/kg bw/day
Worker - Short term - Systemic effects	-	4700 mg/m <sup>3</sup>	-

#### 8.2 Exposure controls

#### 8.2.1 Appropriate engineering controls

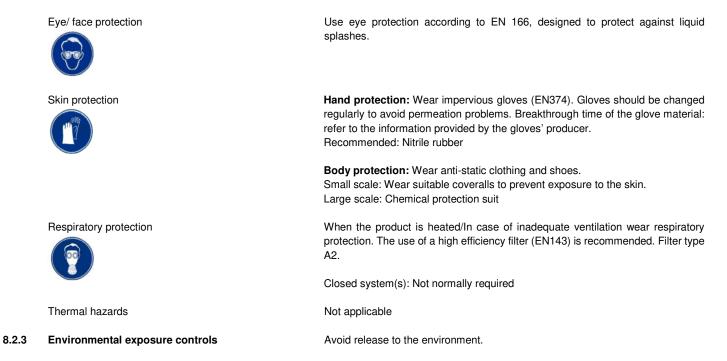

8.2.2 Individual protection measures, such as personal protective equipment

Provide adequate ventilation, including appropriate local extraction if dusts, fumes or vapours are likely to be evolved. Store in a cool/low-temperature, wellventilated (dry) place away from heat and ignition sources. Guarantee that the eye flushing systems and safety showers are located close to the working place.

Fuels are typically used, transferred and transported in closed systems. If exposure is likely (i.e. during sampling) the following advice may be appropriate. Keep good industrial hygiene. Always wash hands before smoking, eating and drinking. Do not eat, drink or smoke at the work place.

Refer to annexes for exposure scenarios detailing use specific exposure controls.

Protective clothing should be selected specifically for the working place, depending on concentration and quantity of the hazardous substances handled. The resistance of the protective clothing to chemicals should be ascertained with the respective supplier.

### SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1	Information on basic physical and chemical properties
-----	---

Physical state	Liquid
Colour	May be coloured
Odour	Fuel oil-like
Melting point/freezing point	< 30 °C
Boiling point or initial boiling point and boiling range	> 350 °C
Flammability	Non-flammable.
Lower and upper explosion limit	Not established
Flash point	> 60 °C

Revision: 24 March 2023 Version: 007

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

Auto-ignition temperature Decomposition temperature pH Kinematic viscosity Solubility Partition coefficient: n-octanol/water (log value) Vapour pressure Density and/or relative density Relative vapour density Particle characteristics > 225 °C Not established Not established 7 – 20.5 mm²/s at 40 °C (<60 mm²/s at 100 °C) Water: 0.4 mg/l at 22 °C slightly soluble. 2.7 – 6 log P 0.5 kPa at 20°C 0.80 – 0.99 g/cm³ at 15 °C > 1 (Air = 1) Not established

9.2 Other information

Vapour may create explosive atmosphere.

SECTION 10: STABILITY AND REACTIVITY		
10.1	Reactivity	Stable under normal conditions. Reacts with - Strong oxidising agents
10.2	Chemical stability	Stable under normal conditions. Hazardous polymerisation will not occur. Product may release Hydrogen Sulphide.
10.3	Possibility of hazardous reactions	Vapours are heavier than air and may travel considerable distances to a source of ignition and flashback. Product may release Hydrogen Sulphide.
10.4	Conditions to avoid	Elevated temperature: > 50 °C Keep away from heat, sources of ignition and direct sunlight.
10.5	Incompatible materials	Keep away from oxidising agents. Strong acids and Alkalis.
10.6	Hazardous decomposition products	A mixture of solid and liquid particulates and gases including unidentified organic and inorganic compounds. Decomposes in a fire giving off toxic fumes: COx, H2S, Sox.

### SECTION 11: TOXICOLOGICAL INFORMATION

11.1	Information on hazard classes as defined in Regulation (EC) No 1272/2008	n	All test data taken from existing ECHA registrations for the substances mentioned.
	Acute toxicity - Ingestion		Based upon the available data, the classification criteria are not met.
	Acute toxicity - ingestion		LD50 (oral,rat) mg/kg: >2000 (OECD 401)
	Acute toxicity - Inhalation		Acute Tox. 4: Harmful if inhaled.
	Acute toxicity - initialation		LC50 (inhalation,rat) mg/l/4h: 4.1 (EPA OTS 798.1150)
	Acute toxicity - Skin contact		Based upon the available data, the classification criteria are not met.
	Acute toxicity - okin contact		LD50 (skin,rabbit) mg/kg: >2000 (OECD 434)
	Skin corrosion/irritation		Based upon the available data, the classification criteria are not met.
	Skin conosion/initiation		Not irritating to skin. (rabbit) (OECD 404)
			EUH066: Repeated exposure may cause skin dryness or cracking. (rat) (OECD
			410)
	Serious eye damage/irritation		Based upon the available data, the classification criteria are not met.
			Not irritating to eyes. (rabbit) (EU Method B.5)
	Respiratory or skin sensitisation		Based upon the available data, the classification criteria are not met.
			Sensitisation (guinea pig) – Negative (OECD 406)
	Germ cell mutagenicity		Based upon the available data, the classification criteria are not met.
			ECHA Registration Endpoint summary:
			Not classified. Studies showed no consistent evidence of mutagenic activity
	Carcinogenicity		Carc. 1B: May cause cancer.
			ECHA Registration Endpoint summary:
			Positive (mouse)
	Reproductive toxicity		Repr. 2; H361d: Suspected of damaging the unborn child.
			Reproductive toxicity: No data available.
			Developmental toxicity: Positive (rat) EPA OTS 798.4900
	STOT - Single Exposure		Based upon the available data, the classification criteria are not met.
	5		Weight of evidence approach.
	STOT - Repeated Exposure		STOT RE 2; May cause damage to organs through prolonged or repeated
			exposure.
		Oral:	No data available.
		Inhalation:	No data available.

Revision: 24 March 2023 Version: 007

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

	Aspiration hazard	Dermal:	NOAEL: 1.06 mg/kg bw/day (rat) (OECD 410) Asp. Tox. 1; May be fatal if swallowed and enters airways. Kinematic viscosity: 7 – 20.5 mm²/s at 40 °C (<60 mm²/s at 100 °C)
11.2	Information on other hazards		
11.2.1	Endocrine disrupting properties		This product does not contain a substance that has endocrine disrupting properties with respect to humans as no components meets the criteria.
11.2.2	Other information		None known
SECTIC	ON 12: ECOLOGICAL INFORMATION		
12.1	Toxicity		Aquatic Acute 1; Very toxic to aquatic life. Aquatic Chronic 1; Very toxic to aquatic life with long lasting effects.
	Short Term (acute):		EL50: (48 hour) (Daphnia magna) 0.22 mg/l (OECD 202)
	Long term (chronic):		The aquatic toxicity was estimated using the PETROTOX computer model. Estimated: 0.1 mg/l (Fish)
12.2	Persistence and degradability		Substance is complex UVCB. Standard tests for this endpoint are intended for single substances and are not appropriate for this complex substance
12.3	Bioaccumulative potential		Substance is complex UVCB. Standard tests for this endpoint are intended for single substances and are not appropriate for this complex substance
12.4	Mobility in soil		Substance is complex UVCB. Standard tests for this endpoint are intended for single substances and are not appropriate for this complex substance
12.5	Results of PBT and vPvB assessment		Not classified as PBT or vPvB. None of the substances in this product fulfil the criteria for being regarded as a PBT or vPvB substance.
12.6	Endocrine disrupting properties		This product does not contain a substance that has endocrine disrupting properties with respect to humans as no components meets the criteria.
12.7	Other adverse effects		None known

### SECTION 13: DISPOSAL CONSIDERATIONS

#### 13.1 Waste treatment methods

Do not empty into drains, dispose of this material and its container at hazardous or special waste collection point. Disposal should be in accordance with local, state or national legislation. Containers of this material may be hazardous when empty since they retain product residue. Containers must not be punctured or destroyed by burning, even when empty. Allocation of a waste code number, according to the European Waste Catalogue, should be carried out in agreement with the regional waste disposal company. Waste code: Fuel Oil (13 07 01) HP5, HP6, HP7, HP10, HP14

Waste classification according to Directive 2008/98/EC (Waste Framework Directive)

### SECTION 14: TRANSPORT INFORMATION

- 14.1 UN number or ID number
- 14.2 UN proper shipping name
- 14.3 Transport hazard class(es)
- 14.4 Packing group
- 14.5 Environmental hazards
- 14.6 Special precautions for user
- 14.7 Maritime transport in bulk according to IMO instruments
- 14.8 Additional information

Workers		Inhalation (mg/m <sup>3</sup> )	0.18
	Long Term	Dermal (mg/kg bw/day)	0.065
		Inhalation (mg/m <sup>3</sup> )	Not defined
Consumer		Dermal (mg/kg bw/day)	Not defined
		Oral (mg/kg bw/day)	0.015

#### Environmental Parameters (PNECs)

Fuel oil, residual is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

#### 3.2 Environmental exposure prediction

Exposure assessment (method/calculation model) The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

Fuel oil, residual is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Environmental exposure	STP	Freshwater	Marine water	Soil	Freshwater sediment	Marine sediment
Predicted Environmental Exposure (PEC)	1.9E-03 mg/l	1.9E-04 mg/l	1.9E-05 mg/l	6.2E-02 mg/kg ww	1.4E+00 mg/kg ww	3.7E-02 mg/kg ww
Risk characterisation ratio (RCR)	2.0E-03	7.6E-03	7.6E-04	3.3E-05	1.3E-02	9.9E-04

Human exposure prediction:

Route of Exposure	Exposure (μg/kg/Day)	Risk characterisation ratio (RCR)
Oral	2.0E+01	7.7E-01
Inhalation	1.6E-01	3.2E-03

4. Evaluation guidance to downstream user					
For scaling see	Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels. Available hazard data do not support the need for a DNEL to be established for other health effects. Further details on scaling and control technologies are provided in SpERC factsheet (http://cefic.org/en/reach-for-industries-libraries.html).				

Revision: 24 March 2023 Version: 007

Exposure assessment instrument/tool/method	Worker	The ECETOC TRA tool has been used to estimate workplace exposures unless otherwise indicated. #### 3.2 Environmental exposure prediction

Exposure assessment (method/calculation model) The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

Fuel oil, residual is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Environmental exposure	STP	Freshwater	Marine water	Soil	Freshwater sediment	Marine sediment
Predicted Environmental Exposure (PEC)	1.5E-01 mg/l	1.5E-02 mg/l	1.5E-03 mg/l	6.3E-02 mg/kg ww	1.8E+00 mg/kg ww	4.6E-02 mg/kg ww
Risk characterisation ratio (RCR)	1.6E-01	6.1E-01	6.1E-02	3.0E-04	7.7E-01	7.7E-02

Human exposure prediction:

Route of Exposure	Exposure (µg/kg/Day)	Risk characterisation ratio (RCR)
Oral	2.2E+01	8.7E-01
Inhalation	3.4E+00	6.6E-02

4. Evaluation guidance to downstream user					
For scaling see	Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels. Available hazard data do not support the need for a DNEL to be established for other health effects. Further details on scaling and control technologies are provided in SpERC factsheet (http://cefic.org/en/reach-for-industries-libraries.html).
