Revision: 1st March 2023 Version: 005

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

Hazard Pictogram(s) DANGER Signal Word(s) Hazard Statement(s) H224: Extremely flammable liquid and vapour. H304: May be fatal if swallowed and enters airways. H315: Causes skin irritation. H340: May cause genetic defects. H350: May cause cancer. H361fd: Suspected of damaging fertility. Suspected of damaging the unborn child. H336: May cause drowsiness or dizziness. (Central nervous system, Inhalation) H411: Toxic to aquatic life with long lasting effects. Precautionary Statement(s) P201: Obtain special instructions before use. P210: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. P273: Avoid release to the environment. P280: Wear protective gloves/protective clothing/eye protection/face protection. P301+P310: IF SWALLOWED: Immediately call a POISON CENTER/doctor. P331: Do NOT induce vomiting. P403+P233: Store in a well-ventilated place. Keep container tightly closed. 2.3 Other hazards May form explosive mixture with air. The vapour is heavier than air; beware of pits and confined spaces. May cause irritation to eyes and air passages. Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1 Substances

SUBSTANCE	CAS No.	EC No.	%W/W
Naphtha (petroleum), full-range straight-run	64741-42-0	265-042-6	100

SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures Self-protection of the first aider

Eliminate sources of ignition. If it is suspected that fumes are still present, the responder should wear an appropriate mask or self-contained breathing apparatus. Drench contaminated clothing with water before removing to avoid risk of sparks from static electricity. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Avoid all contact. Do not ingest. If swallowed then seek immediate medical assistance.

Hydrogen sulphide (H2S) can accumulate in the headspace of storage tanks and reach potentially hazardous concentrations.

If there is any suspicion of inhalation: A self contained breathing apparatus should be worn. Remove to fresh air immediately.

H2S Warning:

Revision: 1st March 2023 Version: 005

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

	Inhalation	IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in
		a position comfortable for breathing. Maintain an open airway. Loosen tight
		clothing such as a collar, tie, belt or waistband. Get medical advice/attention if
		you feel unwell.
	Skin contact	IF ON SKIN (or hair): Remove contaminated clothing immediately and wash
	Skir Sonast	affected skin with plenty of water or soap and water. If irritation (redness, rash,
		blistering) develops, get medical attention.
		S/ 1 / S
	Eye contact	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact
		lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get
		medical advice/attention.
	Ingestion	IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the
		lungs. If vomiting occurs spontaneously, keep head below hips to prevent
		aspiration into the lungs. If unconscious, place in recovery position and get
		medical attention immediately. Do not give anything by mouth to an unconscious
		person. Get medical attention immediately. Do not wait for symptoms to appear.
4.2	Most important symptoms and effects, both acute	Inhalation: May cause drowsiness or dizziness. Headache, nausea and vomiting.
	and delayed	Skin Contact: Causes skin irritation.
		Eye Contact: Causes serious eye irritation.
		Ingestion: Aspiration into the lungs may cause chemical pneumonitis, which
		can be fatal. Ingestion may cause irritation of the gastrointestinal tract. Nausea,
		Vomiting and Diarrhoea.
4.3	Indication of any immediate medical attention and	Treat symptomatically.
	special treatment needed	
	Notes to a physician:	IF INHALED: If unconscious, place in recovery position and get medical attention
	Notes to a physician.	immediately. Administer oxygen if available and artificial respiration if necessary.
		IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the
		•
		lungs. If aspiration is suspected obtain immediate medical attention. If vomiting
		occurs spontaneously, keep head below hips to prevent aspiration into the lungs.

SECTION 5: FIREFIGHTING MEASURES

5.1 Extinguishing media Suitable extinguishing media

Unsuitable extinguishing media

5.2 Special hazards arising from the substance or mixture

Extinguish with sand or dry chemical. Foam, Carbon dioxide, Water fog or dry powder

Do not use water jet. Direct water jet may spread the fire.

Extremely flammable liquid and vapour. Will float and can be reignited on surface water. Decomposes in a fire giving off toxic fumes: A mixture of solid and liquid particulates and gases including unidentified organic and inorganic compounds. May form explosive mixture with air. Prevent liquid entering sewers, basements and any watercourses. Vapours are heavier than air and may travel considerable distances to a source of ignition and flashback. If sulphur compounds are present in appreciable amounts, combustion products may include also H2S and SOx (sulfur oxides) or sulfuric acid

5.3 Advice for firefighters

Fight fire with normal precautions from a reasonable distance. Fire fighters should wear complete protective clothing including self-contained breathing apparatus. Keep containers cool by spraying with water if exposed to fire. Avoid release to the environment. Dike fire control water for later disposal.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures Caution - spillages may be slippery. Ensure operatives are trained to minimise exposures. Ensure suitable personal protection during removal of spillages. Eliminate sources of ignition. Shut off leaks if without risk. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid all contact with substance. Ensure adequate ventilation. Do not breathe vapour. Do not ingest. If swallowed then seek immediate medical assistance. All official European languages. Do not use sparking tools. Use non-sparking ventilation systems, approved explosion-proof equipment, and intrinsically safe electrical systems.

Revision: 1st March 2023 Version: 005

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

	H2S Warning: Small spillages: Large spillages:	Product may release Hydrogen Sulphide. Exposure controls - These controls may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H2S alarms, Personal H2S alarms, Personal escape sets, H2S awareness training. Please see section 8 for appropriate personal protection equipment Wear flame-resistant antistatic protective clothing. Evacuate the area and keep personnel upwind. Drench contaminated clothing with water before removing to avoid risk of sparks from static electricity. Avoid all contact. Wear chemical protection suit and breathing apparatus. See Also Section: 8.
6.2	Environmental precautions	Avoid release to the environment. Do not allow to enter drains, sewers or watercourses. Spillages or uncontrolled discharges into watercourses must be alerted to the Environment Agency or other appropriate regulatory body. If necessary: Dike area to contain the spill and prevent releases to sewers, drains, or other waterways.
6.3	Methods and material for containment and cleaning up	Provided it is safe to do so, isolate the source of the leak. Use non-sparking equipment when picking up flammable spill. The vapour is heavier than air; beware of pits and confined spaces. Ensure that the equipment is adequately grounded. Allow small spillages to evaporate provided there is adequate ventilation. Wear flame-resistant antistatic protective clothing. Wear chemical protection suit and breathing apparatus.
	Spillages onto land:	In case of soil contamination, remove contaminated soil and treat in accordance with local regulations. Adsorb spillages onto sand, earth or any suitable adsorbent material. Transfer to a lidded container for disposal or recovery. Dispose of this material and its container as hazardous waste. Small spillages: Allow small spillages to evaporate provided there is adequate ventilation. Wear flame-resistant antistatic protective clothing. Large spillages: Cover spillage with foam to reduce evaporation. Do not use water jet.
	Spillages on water or at sea:	Collect as much as possible in clean container for reuse or disposal. Small spillages: Contain product with floating barriers or other equipment. Collect spilled product by absorbing with specific floating absorbents. Large spillages: Open waters should be contained with floating barriers or other mechanical means and recovered, only if this is strictly necessary and if fire/explosion risks can be adequately prevented. Otherwise control the spreading of the spillage, and let the substance evaporate naturally.
6.4	Reference to other sections	See Section: 8,13

SECTION 7: HANDLING AND STORAGE

7.1	Precautions for safe handling	Obtain special instructions before use. Keep away from sources of ignition - No smoking. Use only outdoors or in a well-ventilated area. Prevent vapour build up by providing adequate ventilation during and after use. May form explosive mixtures with air. Take action to prevent static discharges. Use non-sparking tools. All parts of the plant and equipment should be electrically bonded together and connected to earth. Electrical continuity should be checked at regular intervals. Antistatic clothing and footwear should be used. The vapour is heavier than air; beware of pits and confined spaces. Avoid all contact with substance. Do not ingest. If swallowed then seek immediate medical assistance. Do not breathe vapour. See Section: 8. Keep good industrial hygiene. Wash hands thoroughly after handling. Contaminated clothing should be thoroughly cleaned.
	H2S Warning:	Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances. These controls may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H2S alarms, Personal H2S alarms, Personal escape sets, H2S awareness training.
7.2	Conditions for safe storage, including any incompatibilities	Light hydrocarbon vapours can build up in the headspace of containers. These can cause flammability / explosion hazards. Bund storage facilities to prevent soil and water pollution in the event of spillage. Keep only in original packaging. Keep

Storage temperature Storage measures

Incompatible materials

7.3 Specific end use(s)

containers properly sealed when not in use. Protect from sunlight. Containers of this material may be hazardous when empty since they retain product residue. Empty container may contain product residue which may result in flammable or explosive vapours inside the container. Stable at ambient temperatures. Suitable containers: Stainless steel, Mild steel Do not store in: Synthetic materials Keep away from oxidising agents.

See Section: 1.2 and/or Exposure Scenario.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

- 8.1 Control parameters
- 8.1.1 Occupational Exposure Limits

No Occupational Exposure Limit assigned. Users are advised to consider national Occupational Exposure Limits or other equivalent values.

- 8.1.2 Biological limit value
- 8.1.3 PNECs and DNELs

Not established.

PNEC: Not established. Naphtha (petroleum), sweetened is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Naphtha (petroleum), sweetened Derived No Effect Level	Oral	Inhalation	Dermal
Worker - Long Term - Systemic effects	-	1300 mg/m ³	-
Worker - Long Term - Local effects	-	840 mg/m ³	-
Worker - Acute - Local effects	-	1100 mg/m ³	-
Consumer - Long Term - Systemic effects	-	1200 mg/m ³	-
Consumer - Long Term - Local effects	-	180 mg/m ³	-
Consumer - Acute - Local effects	-	640 mg/m ³	-

8.2 Exposure controls

8.2.2

8.2.1 Appropriate engineering controls

protective equipment (PPE)

Individual protection measures, such as personal

Provide adequate ventilation, including appropriate local extraction if dusts, fumes or vapours are likely to be evolved. Store in a cool/low-temperature, wellventilated (dry) place away from heat and ignition sources. Guarantee that the eye flushing systems and safety showers are located close to the working place.

Protective clothing should be selected specifically for the working place, depending on concentration and quantity of the hazardous substances handled. The resistance of the protective clothing to chemicals should be ascertained with the respective supplier.

Fuels are typically used, transferred and transported in closed systems. If exposure is likely (i.e. during sampling) the following advice may be appropriate. Keep good industrial hygiene. Always wash hands before smoking, eating and drinking. Do not eat, drink or smoke at the work place.

Refer to annexes for exposure scenarios detailing use specific exposure controls

Use eye protection according to EN 166, designed to protect against liquid splashes.

Eye/ face protection

Skin protection

Hand protection: Wear impervious gloves (EN374). Gloves should be changed regularly to avoid permeation problems. Breakthrough time of the glove material: refer to the information provided by the gloves' producer. Recommended: Nitrile rubber.

Body protection: Wear anti-static clothing and shoes.

Revision: 1st March 2023 Version: 005

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

small scale: Wear suitable coveralls to prevent exposure to the skin. large scale: Chemical protection suit.

Respiratory protection

Thermal hazards

8.2.3 Environmental Exposure Controls

When the product is heated /In case of inadequate ventilation wear respiratory protection. The use of a high efficiency filter (EN143) is recommended. Filter type A1 $\,$

Closed system(s): Not normally required.

Not applicable.

Avoid release to the environment.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1	Information on basic physical and chemical proper	ties
	Physical state	Liquid
	Colour	Colourless
	Odour	Hydrocarbon
	Melting point/freezing point	< - 60 °C
	Boiling point or initial boiling point and boiling range	< 35 °C
	Flammability	not applicable - Liquid
	Lower and upper explosion limit	Flammable Limits (Lower) (%v/v) 1
		Flammable Limits (Upper) (%v/v) 10
	Flash point	< 0 °C
	Auto-ignition temperature	> 220 °C
	Decomposition temperature	Not established
	рН	Not established
	Kinematic viscosity	1 mm²/s @ 20 °C
	Solubility	Immiscible with water.
	Partition coefficient: n-octanol/water (log value)	not applicable. Substance is complex UVCB.
	Vapour pressure	4 - 240 kPa @ 37.8°C
	Density and/or relative density	0.62 – 0.88 g/cm³ @ 15 °C
	Relative vapour density	> 2
	Particle characteristics	Not established

9.2 Other information

None Known

SECTION 10: STABILITY AND REACTIVITY

10.1	Reactivity	Stable under normal conditions. Reacts with - Strong oxidising agents
10.2	Chemical stability	Stable under normal conditions. Hazardous polymerisation will not occur.
		Product may release Hydrogen Sulphide.
10.3	Possibility of hazardous reactions	Extremely flammable liquid and vapour. May form explosive mixture with air.
		Vapours are heavier than air and may travel considerable distances to a source
		of ignition and flashback. Product may release Hydrogen Sulphide.
10.4	Conditions to avoid	Elevated temperature. Keep away from heat, hot surfaces, sparks, open flames
		and other ignition sources. No smoking. Keep away from direct sunlight.
10.5	Incompatible materials	Keep away from oxidising agents. Strong Acids and Alkalis.
10.6	Hazardous decomposition products	A mixture of solid and liquid particulates and gases including unidentified
		organic and inorganic compounds. Decomposes in a fire giving off toxic fumes:
		COx, H2S, SOx,

SECTION 11: TOXICOLOGICAL INFORMATION

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008 Acute toxicity - Ingestion All test data taken from existing ECHA registrations for the substances mentioned.

Based upon the available data, the classification criteria are not met. LD50 > 5000 mg/kg bw/day (rat) (OECD 401)

Revision: 1st March 2023 Version: 005

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

	Acute toxicity - Inhalation		Based upon the available data, the classification criteria are not met.
			LC50 Vapour > 5600 mg/m ³ Air (rat) (OECD 403)
	Acute toxicity - Skin contact		Based upon the available data, the classification criteria are not met.
			LD50 > 2000 mg/kg bw/day (rabbit) (OECD 402)
	Skin corrosion/irritation		Skin Irrit. 2; Causes skin irritation.
			Irritating to skin. (rabbit) (OECD 404)
	Serious eye damage/irritation		Based upon the available data, the classification criteria are not met.
			Not irritating to eyes (rabbit) (OECD 405)
	Respiratory or skin sensitisation		Based upon the available data, the classification criteria are not met.
			Sensitisation (guinea pig) - Negative (OECD 406)
	Germ cell mutagenicity		Muta. 1B; May cause genetic defects. Harmonised Classification.
			ECHA Registration Endpoint summary: According to EU CLP Classification (EC
			no. 1272/2008), there is a regulatory requirement to classify gasoline and
			naphtha streams as hazardous for this endpoint when they contain >0.1%
			benzene
	Carcinogenicity		Carc. 1B; May cause cancer. Harmonised Classification.
			ECHA Registration Endpoint summary: According to EU CLP Classification (EC
			no. 1272/2008), there is a regulatory requirement to classify gasoline and
			naphtha streams as hazardous for this endpoint when they contain >0.1%
			benzene
	Reproductive toxicity		Repr. 2; Suspected of damaging fertility or the unborn child.
			ECHA Registration Endpoint summary: According to EU CLP Classification (EC
			no. 1272/2008), there is a regulatory requirement to classify gasoline and
			naphtha streams as hazardous for this endpoint when they contain >0.1%
			Toluene and/Or n-Hexane
	STOT - Single Exposure		STOT SE 3; May cause drowsiness or dizziness.
			Weight of evidence approach
	STOT - Repeated Exposure		Based upon the available data, the classification criteria are not met.
		oral:	No adverse effect observed (rat) (Halder CA, et al. (1985))
		inhalation:	No adverse effect observed (rat) (OECD 453)
		malation	Chronic - Systemic effects NOAEC 1402 mg/m ³
		dermal:	No adverse effect observed. (Mouse) (OECD TG 410)
		dennai.	Chronic - Systemic effects NOAEL 375 mg/kg bw/day
	Aspiration hazard		Asp. Tox. 1; May be fatal if swallowed and enters airways. Harmonised
			Classification.
			Viscosity: <1 mm ² /s @ 20 °C
11.2	Information on other hazards		
11.2.1	Endocrine disrupting properties		This substance does not have endocrine disrupting properties with respect to
			humans.
11.2.2	Other information		None.

SECTION 12: ECOLOGICAL INFORMATION

12.1	Toxicity Short Term (acute): Long Term (Chronic):	Aquatic Chronic 2; Toxic to aquatic life with long lasting effects. LL50 (Fish) (96hr) 10 mg/l (OCED 203) According to the EU CLP Regulation (EC No. 1272/2008) criteria, substances in the low boiling point naphtha category are classified as Chronic Category 2 (H411) for the environment based on acute invertebrate and alga toxicity.
12.2	Persistence and degradability	Readily biodegradable. (OECD 301F)
12.3	Bioaccumulative potential	Substance is complex UVCB. The BCF (fish) of this substance components is well below the criteria for bioaccumulation. Therefore, this substance is not considered as bioaccumulative substance.(ECHA registration dossier: PBT assessment 2)
12.4	Mobility in soil	The product is predicted to have low mobility in soil. Immiscible with water.
12.5	Results of PBT and vPvB assessment	Substance is complex UVCB. This substance does not contain PBT constituents included in the SVHC candidate list at concentrations above 0.1%.
12.6	Endocrine disrupting properties	This substance does not have endocrine disrupting properties with respect to non-target organisms.
12.7	Other adverse effects	None Known

Revision: 1st March 2023 Version: 005

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

SECTION 13: DISPOSAL CONSIDERATIONS

	13.1	Waste treatment methods Waste classification according to Directive 2008/98/EC (Waste Framework Directive)	Dispose of this material and its container as hazardous waste Do not empty into drains, dispose of this material and its container at hazardous or special waste collection point. Disposal should be in accordance with local, state or national legislation. Containers of this material may be hazardous when empty since they retain product residue. Containers must not be punctured or destroyed by burning, even when empty. Allocation of a waste code number, according to the European Waste Catalogue, should be carried out in agreement with the regional waste disposal company. Waste code: 13 07 01 EU Waste Codes: HP3, HP4, HP7, HP10, HP11, HP14
--	------	--	--

SECTION 14: TRANSPORT INFORMATION				
		ADR/RID	IMDG/ADN	
14.1	UN number	UN 1268	UN 1268	
14.2	Proper Shipping Name	PETROLEUM DISTILLATES N.O.S.	PETROLEUM DISTILLATES N.O.S.	
14.3	Transport hazard class(es)	3	3+(N2, CMR,F)	
14.4	Packing group	1	I	
14.5	Environmental hazards	MILIEUGEVAARLIJK / ENVIRONMENTALLY HAZARDOUS/ UMWELTGEFÄHREND /DANGEREUX POUR/ L'ENVIRONNEMENT		
14.6	Special precautions for user	See Section: 2		
14.7	Maritime transport in bulk according to IMO instruments	This product is being carried under the scope of MARPOL Annex 1. Special Precautions: Refer to		
		Chapter 7 'Handling and Storage' for special precautions which a user needs to be aware of, or needs to comply with, in connection with transport.		
14.8	Additional information	ADR HIN: 33	EmS: F-E, S-E	
		Tunnel restriction code: 3 (D/E) Limited Quantity: 500 ml	Limited Quantity: 500ml	
	Special Provisions	664		

SECTION 15: REGULATORY INFORMATION

15.1	Safety, health and environmental regulations/legislation specific for the substance or mixture	
15.1.1	EU regulations	
	Seveso	Upper Tier: 25000 tonnes
		Lower Tier: 2500 tonnes
	Annex XVII (Restrictions)	In accordance with REACH Annex XVII entry 30 (c) this substance is exempt from
		Entry 28 and 29 of REACH Annex XVII as it is to be sold as a fuel in a closed system.
15.1.2	National regulations	
	Germany	Wassergefährdungsklasse (Germany). WGK number: 3
15.2	Chemical Safety Assessment	A REACH chemical safety assessment (CSA) has been carried out. Refer to annexes for exposure scenarios detailing use specific exposure controls.

SECTION 16: OTHER INFORMATION

The following sections contain revisions or new statements: New SDS Regulation 2020/878 format, all sections have been updated to include new information. Please review SDS with care.

Environmental Parameter (PNECs)

Naphtha (petroleum), sweetened is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Concentration: benzene (Worst case assumption. Contains benzene. @1%).

Concentration of substance in product Covers concentrations up to $100\% (\leq 1\%$ benzene content) Human factors not influenced by risk management Potential exposure area Not defined Frequency and duration of use Exposure duration per day Covers daily exposures up to 8 hours (unless stated differently) Frequency of use (days per year) 300 Other operational conditions affecting worker exposure PROC3 Outdoor Area of use All other PROC's Not defined (default = Indoor) Characteristics of the surroundings Not defined

General measures applicable to all activities

Assumes a good basic standard of occupational hygiene is implemented. Assumes activities are at ambient temperature (unless stated differently). General measures (skin irritants)

Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent/minimise exposures and to report any skin problems that may develop.

General measures (carcinogens)

Consider technical advances and process upgrades (including automation) for the elimination of releases. minimise exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation. Drain down systems and clear transfer lines prior to breaking containment. Clean/flush equipment, where possible, prior to maintenance Where there is potential for exposure: restrict access to authorised persons; provide specific activity training to operators to minimise exposures; wear suitable gloves and coveralls to prevent skin contamination; wear respiratory protection when its use is identified for certain contributing scenario; clear up spills immediately and dispose of waste safely. Ensure safe systems of work or equivalent arrangements are in place to manage risks. Regularly inspect, test and maintain all control measures. Consider the need for risk based health surveillance.

Technical conditions of use

rechnical conditions of use	
PROC1, PROC2, PROC2 (Storage), PROC3, PROC16	Handle substance within a closed system.
PROC2 (Storage)	Provide a good standard of general ventilation. Natural ventilation is from doors, windows etc. Controlled ventilation means air is supplied or removed by a powered fan. (Efficiency of at least 30 %)
PROC8b (Bulk), PROC8b (Drum/batch transfers), PROC8b (refuelling)	Ensure material transfers are under containment or extract ventilation. (Efficiency of at least 90 %)
Organisational measures	
PROC8a (Maintenance)	Drain down and flush system prior to equipment break-in or maintenance. Retain drain downs in sealed storage pending disposal or for subsequent recycle. Clear spills immediately. (Efficiency of at least 83 %)
Risk management measures related to human he	alth
Respiratory protection	No special measures are required.

ECETOC TRA (benzene content)

3.2 Environmental exposure prediction Exposure assessment (method/calculation model)

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

Naphtha (petroleum), sweetened is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the PEC of each group of components in the substance. These are used to estimate the environmental risk for the substance As the model assumes fractionation before entering the environment, the PEC is not of the substance as manufactured but is a some of the constituents expected to be present in the environmental compartment.

Environmental exposure	STP	freshwater	marine water	Soil	freshwater sediment	marine sediment
Predicted Environmental Exposure (PEC)	2.28E-03 mg/L	3.85E-03 mg/L	2.29E-05 mg/L	5.04E-04 mg/kg ww	8.59E-03 mg/kg ww	1.56E-04 mg/kg ww
Risk characterisation ratio (RCR)	2.59E-04	2.10E-02	1.18E-04	1.24E-03	8.73E-03	1.58E-04

Human exposure prediction:

Route of Exposure	Exposure (µg/kg ⁻¹ day ⁻¹)	Risk characterisation ratio (RCR)
Oral	0.30	2.95E-03
Inhalation	5.18	5.58E-03

4.0 Evaluation guidance to downstream user Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels. For scaling see Available hazard data do not support the need for a DNEL to be established for other health effects. Further details on scaling and control technologies are provided in SpERC factsheet (http://cefic.org/en/reachfor-industries-libraries.html). Exposure calculated for benzene and assumes that the substance contains 1 % benzene. Arithmetic scaling may be possible if the batch contains < 1 % benzene</td> Consumer ECETOC TRA
