2.2 Label elements Product Description

Revision: 1st March 2023 Version: 005

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

Hazard Pictogram(s) Signal Word(s) DANGER Hazard Statement(s) H224: Extremely flammable liquid and vapour. H304: May be fatal if swallowed and enters airways. H315: Causes skin irritation. H340: May cause genetic defects. H350: May cause cancer. H361fd: Suspected of damaging fertility. Suspected of damaging the unborn child. H336: May cause drowsiness or dizziness. (Central nervous system, Inhalation) H411: Toxic to aquatic life with long lasting effects. Precautionary Statement(s) P201: Obtain special instructions before use. P210: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. P273: Avoid release to the environment. P280: Wear protective gloves/protective clothing/eye protection/face protection. P301+P310: IF SWALLOWED: Immediately call a POISON CENTER/doctor. P331: Do NOT induce vomiting. P403+P233: Store in a well-ventilated place. Keep container tightly closed. 2.3 Other hazards May form explosive mixture with air. The vapour is heavier than air; beware of pits and confined spaces. May cause irritation to eyes and air passages. Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances.

### SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1 Substances

| SUBSTANCE | CAS No.    | EC No.    | %W/W |
|-----------|------------|-----------|------|
| Gasoline  | 86290-81-5 | 289-220-8 | 100  |

### **SECTION 4: FIRST AID MEASURES**

4.1

**Description of first aid measures** Self-protection of the first aider

H2S Warning:

Eliminate sources of ignition. If it is suspected that fumes are still present, the responder should wear an appropriate mask or self-contained breathing apparatus. Drench contaminated clothing with water before removing to avoid risk of sparks from static electricity. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Avoid all contact. Do not ingest. If swallowed then seek immediate medical assistance.

Hydrogen sulphide (H2S) can accumulate in the headspace of storage tanks and reach potentially hazardous concentrations.

If there is any suspicion of inhalation: A self contained breathing apparatus should be worn. Remove to fresh air immediately.

4.3

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

| IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in                          |
|--|
| a position comfortable for breathing. Maintain an open airway. Loosen tight                                    |
| clothing such as a collar, tie, belt or waistband. Get medical advice/attention if                             |
| you feel unwell.   |
| IF ON SKIN (or hair): Remove contaminated clothing immediately and wash  |
| affected skin with plenty of water or soap and water. If irritation (redness, rash,                            |
| blistering) develops, get medical attention.   |
| IF IN EYES: Rinse cautiously with water for several minutes. Remove contact                                    |
| lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice/attention. |
| IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the                                    |
| lungs. If vomiting occurs spontaneously, keep head below hips to prevent                                       |
| aspiration into the lungs. If unconscious, place in recovery position and get                                  |
| medical attention immediately. Do not give anything by mouth to an unconscious                                 |
| person. Get medical attention immediately. Do not wait for symptoms to appear.                                 |
| Inhalation: May cause drowsiness or dizziness. Headache, nausea and vomiting.                                  |
| Skin Contact: Causes skin irritation.  |
| Eye Contact: Causes serious eye irritation.  |
| Ingestion: Aspiration into the lungs may cause chemical pneumonitis, which                                     |
| can be fatal. Ingestion may cause irritation of the gastrointestinal tract. Nausea,                            |
| Vomiting and Diarrhoea.  |
| Treat symptomatically.   |
| IF INHALED: If unconscious, place in recovery position and get medical attention                               |
| immediately. Administer oxygen if available and artificial respiration if necessary.                           |
| IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the                                    |
| lungs. If aspiration is suspected obtain immediate medical attention. If vomiting                              |
|  |

#### **SECTION 5: FIREFIGHTING MEASURES**

| 5.1 | <b>Extinguishing media</b><br>Suitable Extinguishing media                                 | Extinguish with sand or dry chemical. Foam, Carbon dioxide, Water fog or dry powder  |
|-----|--|--|
| 5.2 | Unsuitable extinguishing media<br>Special hazards arising from the substance or<br>mixture | Do not use water jet. Direct water jet may spread the fire.<br>Extremely flammable liquid and vapour. Will float and can be reignited on surface<br>water. Decomposes in a fire giving off toxic fumes: A mixture of solid and liquid  |
|     | mixture  | particulates and gases including unidentified organic and inorganic compounds.<br>May form explosive mixture with air. Prevent liquid entering sewers, basements   |
|     |  | and any watercourses. Vapours are heavier than air and may travel considerable distances to a source of ignition and flashback. If sulphur compounds are present   |
|     |  | in appreciable amounts, combustion products may include also H2S and SOx (sulfur oxides) or sulfuric acid  |
| 5.3 | Advice for fire-fighters   | Fight fire with normal precautions from a reasonable distance. Fire fighters should<br>wear complete protective clothing including self-contained breathing apparatus.<br>Keep containers cool by spraying with water if exposed to fire. Avoid release to<br>the environment. Dike fire control water for later disposal. |

### SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures Caution - spillages may be slippery. Ensure operatives are trained to minimise exposures. Ensure suitable personal protection during removal of spillages. Eliminate sources of ignition. Shut off leaks if without risk. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid all contact with substance. Ensure adequate ventilation. Do not breathe vapour. Do not ingest. If swallowed then seek immediate medical assistance. Do not use sparking tools. Use non-sparking ventilation systems, approved explosion-proof equipment, and intrinsically safe electrical systems.

occurs spontaneously, keep head below hips to prevent aspiration into the lungs.

|-----------------------|--------------------------|-------------------------------|

|     | H2S Warning:<br>Small spillages:<br>Large spillages:    | Product may release Hydrogen Sulphide. Exposure controls - These controls may<br>include: Segregation of areas, Access only to authorised persons, Permit to work<br>systems, Confined space working procedures, Area H2S alarms, Personal H2S<br>alarms, Personal escape sets, H2S awareness training. Please see section 8 for<br>appropriate personal protection equipment<br>Wear flame-resistant antistatic protective clothing.<br>Evacuate the area and keep personnel upwind. Drench contaminated clothing<br>with water before removing to avoid risk of sparks from static electricity. Avoid all<br>contact. Wear chemical protection suit and breathing apparatus. See Also<br>Section: 8. |
|-----|---|--|
| 6.2 | Environmental precautions                               | Avoid release to the environment. Do not allow to enter drains, sewers or watercourses. Spillages or uncontrolled discharges into watercourses must be alerted to the Environment Agency or other appropriate regulatory body. If necessary: Dike area to contain the spill and prevent releases to sewers, drains, or other waterways.  |
| 6.3 | Methods and material for containment and cleaning<br>up | Provided it is safe to do so, isolate the source of the leak. Use non-sparking equipment when picking up flammable spill. The vapour is heavier than air; beware of pits and confined spaces. Ensure that the equipment is adequately grounded. Allow small spillages to evaporate provided there is adequate ventilation. Wear flame-resistant antistatic protective clothing. Wear chemical protection suit and breathing apparatus.   |
|     | Spillages onto land:                                    | In case of soil contamination, remove contaminated soil and treat in accordance<br>with local regulations. Adsorb spillages onto sand, earth or any suitable adsorbent<br>material. Transfer to a lidded container for disposal or recovery. Dispose of this<br>material and its container as hazardous waste.<br><b>Small spillages:</b> Allow small spillages to evaporate provided there is adequate<br>ventilation. Wear flame-resistant antistatic protective clothing.<br><b>Large spillages:</b> Cover spillage with foam to reduce evaporation. Do not use<br>water jet.   |
|     | Spillages on water or at sea:                           | <ul> <li>Water jet.</li> <li>Collect as much as possible in clean container for reuse or disposal.</li> <li>Small spillages: Contain product with floating barriers or other equipment.</li> <li>Collect spilled product by absorbing with specific floating absorbents.</li> <li>Large spillages: Open waters should be contained with floating barriers or other mechanical means and recovered, only if this is strictly necessary and if fire/explosion risks can be adequately prevented. Otherwise control the spreading of the spillage, and let the substance evaporate naturally.</li> </ul>  |
| 6.4 | Reference to other sections                             | See Section: 8,13  |

#### **SECTION 7: HANDLING AND STORAGE**

7.1 Precautions for safe handling Obtain special instructions before use. Keep away from sources of ignition - No smoking. Use only outdoors or in a well-ventilated area. Prevent vapour build up by providing adequate ventilation during and after use. May form explosive mixtures with air. Take action to prevent static discharges. Use non-sparking tools. All parts of the plant and equipment should be electrically bonded together and connected to earth. Electrical continuity should be checked at regular intervals. Antistatic clothing and footwear should be used. The vapour is heavier than air; beware of pits and confined spaces. Avoid all contact with substance. Do not ingest. If swallowed then seek immediate medical assistance. Do not breathe vapour. See Section: 8. Keep good industrial hygiene. Wash hands thoroughly after handling. Contaminated clothing should be thoroughly cleaned. H2S Warning: Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances. These controls may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H2S alarms, Personal H2S alarms, Personal escape sets, H2S awareness training.

Revision: 1st March 2023 Version: 005

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

| 7.2 | Conditions for safe storage, including any |
|-----|--|
|     | incompatibilities                          |

Light hydrocarbon vapours can build up in the headspace of containers. These can cause flammability / explosion hazards. Bund storage facilities to prevent soil and water pollution in the event of spillage. Keep only in original packaging. Keep containers properly sealed when not in use. Protect from sunlight. Containers of this material may be hazardous when empty since they retain product residue. Empty container may contain product residue which may result in flammable or explosive vapours inside the container.

| Storage | temperature |
|---------|-------------|
| Storage | measures    |

Incompatible materials7.3 Specific end use(s)

Stable at ambient temperatures. Suitable containers: Stainless steel, Mild steel Do not store in: Synthetic materials Keep away from oxidising agents. See Section: 1.2 and/or Exposure Scenario.

### SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

- 8.1 Control parameters
- 8.1.1 Occupational Exposure Limits
- 8.1.2 Biological limit value
- 8.1.3 PNECs and DNELs

No Occupational Exposure Limit assigned. Users are advised to consider national Occupational Exposure Limits or other equivalent values.

### PNEC: Not established. Gasoline is a hydrocarbon UVCB. The hydrocarbon

block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Not established.

#### 8.2 Exposure controls

8.2.1 Appropriate engineering controls

Provide adequate ventilation, including appropriate local extraction if dusts, fumes or vapours are likely to be evolved. Store in a cool/low-temperature, wellventilated (dry) place away from heat and ignition sources. Guarantee that the eye flushing systems and safety showers are located close to the working place.

8.2.2 Individual protection measures, such as personal protective equipment (PPE) Protective equipment of the registrance of th

Protective clothing should be selected specifically for the working place, depending on concentration and quantity of the hazardous substances handled. The resistance of the protective clothing to chemicals should be ascertained with the respective supplier.

Fuels are typically used, transferred and transported in closed systems. If exposure is likely (i.e. during sampling) the following advice may be appropriate. Keep good industrial hygiene. Always wash hands before smoking, eating and drinking. Do not eat, drink or smoke at the work place.

Refer to annexes for exposure scenarios detailing use specific exposure controls

Use eye protection according to EN 166, designed to protect against liquid splashes.

Eye/ face protection

Skin protection

**Hand protection:** Wear impervious gloves (EN374). Gloves should be changed regularly to avoid permeation problems. Breakthrough time of the glove material: refer to the information provided by the gloves' producer.

Revision: 1st March 2023 Version: 005

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

 Recommended: Nitrile rubber.

 Body protection: Wear anti-static clothing and shoes.

 small scale: Wear suitable coveralls to prevent exposure to the skin.

 large scale: Chemical protection suit.

 Respiratory protection

 Vehen the product is heated /In case of inadequate ventilation wear respiratory protection. The use of a high efficiency filter (EN143) is recommended. Filter type A1

 Closed system(s): Not normally required.

 Thermal hazards
 Not applicable.

 8.2.3
 Environmental Exposure Controls
 Avoid release to the environment.

### **SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES**

#### SECTION 13: DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

Dispose of this material and its container as hazardous waste. Do not empty into drains, dispose of this material and its container at hazardous or special waste collection point. Disposal should be in accordance with local, state or national legislation. Containers of this material may be hazardous when empty since they retain product residue. Containers must not be punctured or destroyed by burning, even when empty. Allocation of a waste code number, according to the European Waste Catalogue, should be carried out in agreement with the regional waste disposal company. Waste code: 13 07 01 EU Waste Codes: HP3, HP4, HP7, HP10, HP11, HP14

Substance is complex UVCB. This substance does not contain PBT constituents

This substance does not have endocrine disrupting properties with respect to

included in the SVHC candidate list at concentrations above 0.1%.

Waste classification according to Directive 2008/98/EC (Waste Framework Directive)

| Environmental Parameter (PNECs) |                                |  |   |

Gasoline is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Concentration: benzene (Worst case assumption. Contains benzene. @1%).

| 2.1 Control of worker exposure   |  |  |  |  |  |  |
| Product characteristics  |  |  |  |  |  |  |
| Physical form of product   | Liquid with high volatility.           |  |  |  |  |  |
| Concentration of substance in product  | Covers concentrations up to 100%       | % (≤ 1 % benzene content)                                    |  |  |  |  |
| Human factors not influenced by risk management  |  |  |  |  |  |  |
| Potential exposure area  | Not defined                            |  |  |  |  |  |
| Frequency and duration of use  |  |  |  |  |  |  |
| Exposure duration per day  | Covers daily exposures up to 8 he      | ours (unless stated differently).                            |  |  |  |  |
| Frequency of use (days per year)   | 300                                    |  |  |  |  |  |
| Other operational conditions affecting worker exp  |  |  |  |  |  |  |
| Area of use  | PROC3                                  | Outdoor  |  |  |  |  |
| Area or use  | All other PROC's                       | Not defined (default = Indoor)                               |  |  |  |  |
| Characteristics of the surroundings  | Not defined                            |  |  |  |  |  |
| General measures applicable to all activities  | •                                      |  |  |  |  |  |
|  | ne is implemented. Assumes activit     | ties are at ambient temperature (unless stated differently). |  |  |  |  |
| General measures (skin irritants)  | · · · · ·                              |  |  |  |  |  |
| Avoid direct skin contact with product. Identify potentia  | I areas for indirect skin contact. Wea | ar gloves (tested to EN374) if hand contact with substance   |  |  |  |  |
| likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to |  |  |  |  |  |  |
| prevent/minimise exposures and to report any skin pre-   | oblems that may develop.               |  |  |  |  |  |
| General measures (carcinogens)   |  |  |  |  |  |  |
| Consider technical advances and process upgrades (i  | ncluding automation) for the elimina   | tion of releases. minimise exposure using measures such      |  |  |  |  |
| as closed systems, dedicated facilities and suitable ge  | eneral/local exhaust ventilation. Dra  | in down systems and clear transfer lines prior to breaking   |  |  |  |  |
| containment. Clean/flush equipment, where possible   | , prior to maintenance Where there     | e is potential for exposure: restrict access to authorised   |  |  |  |  |
| persons; provide specific activity training to operators   | to minimise exposures; wear suit       | able gloves and coveralls to prevent skin contamination;     |  |  |  |  |
|  |  | clear up spills immediately and dispose of waste safely.     |  |  |  |  |
|  | -                                      | Regularly inspect, test and maintain all control measures.   |  |  |  |  |
| Consider the need for risk based health surveillance.  |  |  |  |  |  |  |
| Technical conditions of use  |  |  |  |  |  |  |
| PROC1, PROC2, PROC2 (Storage), PROC3   | Handle substance within a closed       | system   |  |  |  |  |
| PROC3 (Sampling)   |  | system to avoid exposure. (Efficiency of at least 95 %)      |  |  |  |  |
| PROUS (Sampling)   |  |  |  |  |  |  |
| PROC8b (Bulk), PROC8b (Drum/batch transfers)   |  | er containment or extract ventilation. (Efficiency of at     |  |  |  |  |
|  | least 97 %)                            |  |  |  |  |  |
| PROC15   | Use fume cupboard. (Efficiency o       | f at least 90 %)   |  |  |  |  |
| Organisational measures  | 1                                      |  |  |  |  |  |
|  |  | r to equipment break-in or maintenance. Retain drain         |  |  |  |  |
| PROC8a (Maintenance)   | downs in sealed storage pending        | disposal or for subsequent recycle. Clear spills             |  |  |  |  |
|  | immediately. (Efficiency of at leas    | t 90 %)  |  |  |  |  |
| Risk management measures related to human hea  | hith                                   |  |  |  |  |  |
| Respiratory protection   | No special measures are required       | 1.   |  |  |  |  |
| Lland and/or Okin protection   |  | Wear suitable gloves tested to EN374. (Efficiency of at      |  |  |  |  |
| Hand and/or Skin protection  | PROC2, PROC2 (Storage)                 | least 80 %)  |  |  |  |  |
|  |  | ,  |  |  |  |  |

Revision: 1st March 2023 Version: 005

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

|  | PROC8a (Maintenanc          | e)            | Wear chemically resistant gloves (tested to EN374) in combination with 'basic' employee training. (Efficiency of at least 90 %) |  |
|--|-----------------------------|---------------|---|--|
| Eye Protection   | No special measures         | are required  | 1.  |  |
| Other operational conditions affecting worker exp  | osure                       |               |   |  |
| Wear suitable coveralls to prevent exposure to the ski                                     | in. Clear transfer lines pr | rior to de-co | upling. Avoid dip sampling.   |  |
| 2.2 Control of environmental exposure  |                             |               |   |  |

#### 3.2 Environmental exposure prediction Exposure assessment (method/calculation model)

ion model) The Hydrocarbon Block Method has been used to calculate

environmental exposure with the Petrorisk model.

Gasoline is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the PEC of each group of components in the substance. These are used to estimate the environmental risk for the substance As the model assumes fractionation before entering the environment, the PEC is not of the substance as manufactured but is a some of the constituents expected to be present in the environmental compartment.

| Environmental exposure                          | STP              | freshwater    | marine<br>water  | Soil                 | freshwater<br>sediment | marine<br>sediment   |
