Revision: 24 March 2023 Version: 006

#### SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 Product identifier

Product name Kerosene (petroleum) sweetened

Product description V3013-JET KEROSENE-Kerosene (petroleum) sweetened

Trade Name JET KEROSENE

 Product code
 JET

 CAS No.
 91770-15-9

 EC No.
 294-799-5

REACH Registration No. 01-2119502385-46-xxxx

1.2 Relevant identified uses of the substance or mixture

and uses advised against Identified use(s)

Page: No **Exposure Scenario** 1 Distribution of Kerosene (petroleum) sweetened (Industrial) 12 2 Formulation and (re)packing of Kerosene (petroleum) 15 sweetened (Industrial) 3 Use as a fuel (Industrial) 18 Use as a fuel (Professional) 21 4 Use as a fuel (Consumer) 24

Uses advised against

Anything other than the above.

1.3 Details of the supplier of the safety data sheet

Company Identification Vitol SA

Place des Bergues 3 1201 Geneva Switzerland +31 10 498 7200 +31 10 452 9545 xreach@vitol.com

1.4 Emergency Telephone Number

E-mail (competent person)

Telephone Fax

Emergency Phone No. +44 (0) 1235 239 670, 24/7
Language(s) spoken: All official European languages.

#### **SECTION 2: HAZARDS IDENTIFICATION**

2.1 Classification of the substance or mixture

**2.1.1** Regulation (EC) No. 1272/2008 (CLP) Flam. Liq. 3; H226 Asp. Tox. 1: H304

Asp. Tox. 1; H304 Skin Irrit. 2; H315

STOT SE 3; H336 (Central nervous system, Inhalation)

Aquatic Chronic 2; H411

2.2 Label elements According to Regulation (EC) No. 1272/2008 (CLP)

Product description V3013-JET KEROSENE-Kerosene (petroleum) sweetened

Hazard Pictogram(s)

Signal Word(s) DANGER

Hazard Statement(s) H226: Flammable liquid and vapour.

H304: May be fatal if swallowed and enters airways.

Revision: 24 March 2023 Version: 006

H315: Causes skin irritation.

H336: May cause drowsiness or dizziness.

H411: Toxic to aquatic life with long lasting effects.

Precautionary Statement(s) P210: Keep away from heat, hot surfaces, sparks, open flames and other

ignition sources. No smoking.

P273: Avoid release to the environment.

P280: Wear protective gloves/protective clothing/eye protection/face protection. P301+P310: IF SWALLOWED: Immediately call a POISON CENTER or

doctor/physician.

P331: Do NOT induce vomiting.

2.3 Other hazards May form explosive mixture with air. The vapour is heavier than air; beware of pits

and confined spaces. Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to

local circumstances.

#### **SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS**

#### 3.1 Substances

SUBSTANCE	CAS No.	EC No.	%W/W
Kerosene (petroleum) sweetened	91770-15-9	294-799-5	100

## **SECTION 4: FIRST AID MEASURES**

#### 4.1 Description of first aid measures

Inhalation

Skin contact

Eye contact

Ingestion

Self-protection of the first aider

swallowed then seek immediate medical assistance.

H2S Warning: Hydrogen sulphide (H2S) can accumulate in the headspace of storage tanks and reach potentially hazardous concentrations.

If there is any suspicion of inhalation: A self contained breathing apparatus should

Eliminate sources of ignition. If it is suspected that fumes are still present, the responder should wear an appropriate mask or self-contained breathing apparatus. Drench contaminated clothing with water before removing to avoid risk of sparks from static electricity. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Avoid all contact. Do not ingest. If

be worn. Remove to fresh air immediately.

IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical advice/attention if you feel unwell.

IF ON SKIN (or hair): Remove contaminated clothing immediately and wash affected skin with plenty of water or soap and water. If irritation (redness, rash, blistering) develops, get medical attention.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice/attention.

IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the lungs. If vomiting occurs spontaneously, keep head below hips to prevent aspiration. If unconscious, place in recovery position and get medical attention immediately. Do not give anything by mouth to an unconscious person. Get medical attention immediately. Do not wait for symptoms to appear.

4.2 Most important symptoms and effects, both acute and delayed Irritation of the respiratory tract. Causes skin irritation. Slightly irritant to eyes. Aspiration into the lungs may cause chemical pneumonitis, which can be fatal.

Page: 2 of 26

Revision: 24 March 2023 Version: 006

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

JET KEROSENE V3013

4.3 Indication of any immediate medical attention and special treatment needed

Notes to a physician:

Ingestion may cause irritation of the gastrointestinal tract. Nausea, Vomiting and Diarrhoea.

Treat symptomatically.

IF INHALED: If unconscious, place in recovery position and get medical attention immediately. Administer oxygen if available and artificial respiration if necessary. IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the lungs. If aspiration is suspected obtain immediate medical attention. If vomiting occurs spontaneously, keep head below hips to prevent aspiration into the lungs.

#### **SECTION 5: FIREFIGHTING MEASURES**

5.1 Extinguishing media

Suitable extinguishing media

Unsuitable extinguishing media

5.2 Special hazards arising from the substance or mixture

5.3 Advice for firefighters

Extinguish with sand or dry chemical. Foam, Carbon dioxide, Water fog or dry powder.

Do not use water jet. Direct water jet may spread the fire.

Flammable liquid and vapour. Will float and can be reignited on surface water. Decomposes in a fire giving off toxic fumes: A mixture of solid and liquid particulates and gases including unidentified organic and inorganic compounds. May form explosive mixture with air. Prevent liquid entering sewers, basements and any watercourses. Vapours are heavier than air and may travel considerable distances to a source of ignition and flashback. If sulphur compounds are present in appreciable amounts, combustion products may include also H2S and SOx (sulfur oxides) or sulfuric acid.

Fight fire with normal precautions from a reasonable distance. Fire fighters should wear complete protective clothing including self-contained breathing apparatus. Keep containers cool by spraying with water if exposed to fire. Avoid release to the environment. Dike fire control water for later disposal.

### **SECTION 6: ACCIDENTAL RELEASE MEASURES**

6.1 Personal precautions, protective equipment and emergency procedures

H2S Warning:

Small spillages: Large spillages:

6.2 Environmental precautions

6.3 Methods and material for containment and cleaning up

Caution - spillages may be slippery. Ensure operatives are trained to minimise exposures. Ensure suitable personal protection during removal of spillages. Eliminate sources of ignition. Shut off leaks if without risk. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid all contact with substance. Ensure adequate ventilation. Do not breathe vapour. Do not ingest. If swallowed then seek immediate medical assistance. Do not use sparking tools. Use non-sparking ventilation systems, approved explosion-proof equipment, and intrinsically safe electrical systems.

Product may release Hydrogen Sulphide. Exposure controls - These controls may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H2S alarms, Personal H2S alarms, Personal escape sets, H2S awareness training. Please see section 8 for appropriate personal protection equipment.

Wear flame-resistant antistatic protective clothing.

Evacuate the area and keep personnel upwind. Drench contaminated clothing with water before removing to avoid risk of sparks from static electricity. Avoid all contact. Wear chemical protection suit and breathing apparatus. See Also Section: 8

Avoid release to the environment. Do not allow to enter drains, sewers or watercourses. Spillages or uncontrolled discharges into watercourses must be alerted to the Environment Agency or other appropriate regulatory body. If necessary: Dike area to contain the spill and prevent releases to sewers, drains, or other waterways.

Provided it is safe to do so, isolate the source of the leak. Use non-sparking equipment when picking up flammable spill. The vapour is heavier than air; beware of pits and confined spaces. Ensure that the equipment is adequately grounded. Allow small spillages to evaporate provided there is adequate ventilation. Wear flame-resistant antistatic protective clothing. Wear chemical protection suit and breathing apparatus.

Revision: 24 March 2023 Version: 006

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

**JET KEROSENE V3013** 

Spillages onto land:

In case of soil contamination, remove contaminated soil and treat in accordance with local regulations. Adsorb spillages onto sand, earth or any suitable adsorbent material. Transfer to a lidded container for disposal or recovery. Dispose of this material and its container as hazardous waste.

**Small spillages:** Allow small spillages to evaporate provided there is adequate ventilation. Wear flame-resistant antistatic protective clothing.

Large spillages: Cover spillage with foam to reduce evaporation. Do not use water jet.

Spillages on water or at sea: Collect as much as possible in clean container for reuse or disposal.

Small spillages: Contain product with floating barriers or other equipment.

Collect spilled product by absorbing with specific floating absorbents.

Large spillages: Open waters should be contained with floating barriers or other mechanical means and recovered, only if this is strictly necessary and if fire/explosion risks can be adequately prevented. Otherwise control the spreading of the spillage, and let the substance evaporate naturally.

See Section: 8,13

6.4 Reference to other sections

#### SECTION 7: HANDLING AND STORAGE

7.1 Precautions for safe handling

H2S Warning:

7.2 Conditions for safe storage, including any incompatibilities

Storage temperature

Storage measures

Incompatible materials

7.3 Specific end use(s)

Obtain special instructions before use. Keep away from sources of ignition. - No smoking. Use only outdoors or in a well-ventilated area. Prevent vapour build up by providing adequate ventilation during and after use. May form explosive mixture with air. Take action to prevent static discharges. Use non-sparking tools. All parts of the plant and equipment should be electrically bonded together and connected to earth. Electrical continuity should be checked at regular intervals. Antistatic clothing and footwear should be used. The vapour is heavier than air; beware of pits and confined spaces. Avoid all contact with substance. Do not ingest. If swallowed then seek immediate medical assistance. Do not breathe vapour. See Section: 8. Keep good industrial hygiene. Wash hands thoroughly after handling. Contaminated clothing should be thoroughly cleaned.

Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances. These controls may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H2S alarms, Personal H2S alarms, Personal escape sets, H2S awareness training. Light hydrocarbon vapours can build up in the headspace of containers. These can cause flammability / explosion hazards. Bund storage facilities to prevent soil and water pollution in the event of spillage. Keep only in original packaging. Keep containers properly sealed when not in use. Protect from sunlight. Containers of this material may be hazardous when empty since they retain product residue. Empty container may contain product residue which may result in flammable or explosive vapours inside the container.

Store in a cool/low-temperature, well-ventilated (dry) place away from heat and

ignition sources.

Keep only in original packaging.

Suitable containers: Mild steel, Stainless steel.

Keep away from oxidising agents. Strong acids and Alkalis.

Unsuitable containers: Synthetic materials See Section: 1.2 and/or Exposure Scenario

#### SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Control parameters

8.1.1 Occupational exposure limits Not established

8.1.2 Biological limit value Not established

8.1.3 PNECs and DNELs DNEL: Not established

Page: 4 of 26

Revision: 24 March 2023 Version: 006

PNEC: Kerosene (petroleum) sweetened is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this

product.

8.2 Exposure controls

8.2.1 Appropriate engineering controls

Provide adequate ventilation, including appropriate local extraction if dusts, fumes or vapours are likely to be evolved. Store in a cool/low-temperature, well-ventilated (dry) place away from heat and ignition sources. Guarantee that the eye flushing systems and safety showers are located close to the working place.

8.2.2 Individual protection measures, such as personal protective equipment

Fuels are typically used, transferred and transported in closed systems. If exposure is likely (i.e. during sampling) the following advice may be appropriate. Keep good industrial hygiene. Always wash hands before smoking, eating and drinking. Do not eat, drink or smoke at the work place.

Refer to annexes for exposure scenarios detailing use specific exposure controls.

Protective clothing should be selected specifically for the working place, depending on concentration and quantity of the hazardous substances handled. The resistance of the protective clothing to chemicals should be ascertained with the respective supplier.

Eye/ face protection

Use eye protection according to EN 166, designed to protect against liquid splashes.

Skin protection

**Hand protection:** Wear impervious gloves (EN374). Gloves should be changed regularly to avoid permeation problems. Breakthrough time of the glove material: refer to the information provided by the gloves' producer.

Recommended: Nitrile rubber

Body protection: Wear anti-static clothing and shoes.

Small scale: Wear suitable coveralls to prevent exposure to the skin.

Large scale: Chemical protection suit

Respiratory protection

When the product is heated/ln case of inadequate ventilation wear respiratory protection. The use of a high efficiency filter (EN143) is recommended. Filter type

A2.

Closed system(s): Not normally required

Thermal hazards Not applicable

**8.2.3** Environmental exposure controls Avoid release to the environment.

#### SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties

Physical state Colour

Odour

Melting point/freezing point

Boiling point or initial boiling point and boiling range

Flammability

Lower and upper explosion limit

Flash point

Auto-ignition temperature

Liquid

Almost colourless to pale yellow

Characteristic

> - 49 °C

150 - 290 °C at 101 kPa

Flammable liquid and vapour.

Not established

23 - 59 °C at 101 kPa

> 210 °C at 101 kPa

Revision: 24 March 2023 Version: 006

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

**JET KEROSENE V3013** 

Decomposition temperature Not established Not established < 7 mm<sup>2</sup>/s at 40 °C Kinematic viscosity Solubility Practically insoluble

Partition coefficient: n-octanol/water (log value) 3.3 - 6.0Vapour pressure < 1 kPa at 40°C

Density and/or relative density 0.77 - 0.85 g/cm3 at 15 °C

Relative vapour density 4.7 - 5 (Air = 1)Particle characteristics Not established

9.2 Other information Vapour may create explosive atmosphere.

Upper/lower flammability or explosive limits Flammable Limits (Lower) (%v/v): 0.7

Flammable Limits (Upper) (%v/v): 5

#### **SECTION 10: STABILITY AND REACTIVITY**

10.1 Reactivity Stable under normal conditions. Reacts with - Strong oxidising agents 10.2 Chemical stability Stable under normal conditions. Hazardous polymerisation will not occur.

Product may release Hydrogen Sulphide.

10.3 Possibility of hazardous reactions Vapours are heavier than air and may travel considerable distances to a source

of ignition and flashback. Product may release Hydrogen Sulphide.

10.4 Conditions to avoid Elevated temperature: > 50 °C

Keep away from heat, sources of ignition and direct sunlight. 10.5 Incompatible materials Keep away from oxidising agents. Strong acids and Alkalis.

10.6 Hazardous decomposition products A mixture of solid and liquid particulates and gases including unidentified

organic and inorganic compounds. Decomposes in a fire giving off toxic fumes:

COx, H2S, Sox.

#### **SECTION 11: TOXICOLOGICAL INFORMATION**

Skin corrosion/irritation

11.1 Information on hazard classes as defined in All test data taken from existing ECHA registrations for the substances

Regulation (EC) No 1272/2008 mentioned.

Acute toxicity - Ingestion Based upon the available data, the classification criteria are not met.

LD50 (oral,rat) mg/kg: >5000 (OECD 420)

Acute toxicity - Inhalation Acute Tox. 4: Harmful if inhaled.

LC50 (inhalation,rat) mg/l/4h: >5.28 No mortality observed (OECD 403) Acute toxicity - Skin contact

Based upon the available data, the classification criteria are not met.

LD50 (skin,rabbit) mg/kg: >2000 (OECD 402)

Skin Irrit. 2; Causes skin irritation.

Irritating to skin. (rabbit) (Unnamed, 1986)

Serious eye damage/irritation Based upon the available data, the classification criteria are not met. Not irritating to eyes. (rabbit) (EPA OTS 798.4500)

Respiratory or skin sensitisation Based upon the available data, the classification criteria are not met.

Sensitisation (guinea pig) – Negative (OECD 406)

Germ cell mutagenicity Based upon the available data, the classification criteria are not met.

In vitro: Negative (OECD 479)

In vivo: Positive (males) Negative (females) (mouse) (Unnamed, 1988) Carcinogenicity

Based upon the available data, the classification criteria are not met.

Negative (mouse) (OECD 451)

Reproductive toxicity Based upon the available data, the classification criteria are not met.

> Reproductive toxicity: Negative (rat) (OECD 415) Developmental toxicity: : Negative (rat) (OECD 414)

STOT - Single Exposure STOT SE 3; May cause drowsiness and dizziness.

Weight of evidence approach

STOT - Repeated Exposure Based upon the available data, the classification criteria are not met.

Oral: NOAEL: 750 mg/kg bw/day (rat) (OECD 408)

Inhalation: No adverse effect observed (rat) (OECD 413)

 $NOAEL >= 1000 \text{ mg/m}^3$ 

Dermal: Causes skin irritation. (rat) (OECD 411)

NOAEL >= 495 mg/kg bw/day (rat)

Revision: 24 March 2023 Version: 006

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

**JET KEROSENE V3013** 

Asp. Tox. 1; May be fatal if swallowed and enters airways. Aspiration hazard

Kinematic viscosity: < 7 mm<sup>2</sup>/s at 40 °C

11.2 Information on other hazards

Long term (chronic):

12.3

12.4

12.7

11.2.1 Endocrine disrupting properties This product does not contain a substance that has endocrine disrupting

properties with respect to humans as no components meets the criteria.

11.2.2 Other information None known

#### SECTION 12: ECOLOGICAL INFORMATION

12.1 **Toxicity** Aquatic Chronic 2; Toxic to aquatic life with long lasting effects.

Short Term (acute): NOEL (Fish) (96 hour) 2.0 mg/l (OECD 203)

The aquatic toxicity was estimated using the PETROTOX computer model.

Estimated NOEL: 0.098 mg/l

12.2 Persistence and degradability Readily biodegradable (according to OECD criteria). (OECD 301F)

Bioaccumulative potential The product has potential for bioaccumulation. LogKow 4.0 Mobility in soil

The product is predicted to have low mobility in soil.

Not classified as PBT or vPvB. None of the substances in this product fulfil the 12.5 Results of PBT and vPvB assessment

criteria for being regarded as a PBT or vPvB substance.

12.6 **Endocrine disrupting properties** This product does not contain a substance that has endocrine disrupting

properties with respect to humans as no components meets the criteria.

None known

#### **SECTION 13: DISPOSAL CONSIDERATIONS**

13.1 Waste treatment methods

Other adverse effects

Dispose of this material and its container as hazardous waste. Do not empty into drains, dispose of this material and its container at hazardous or special waste collection point. Disposal should be in accordance with local, state or national legislation. Containers of this material may be hazardous when empty since they retain product residue. Containers must not be punctured or destroyed by burning, even when empty. Allocation of a waste code number, according to the European Waste Catalogue, should be carried out in agreement with the regional waste disposal company.

Waste classification according to Directive 2008/98/EC (Waste Framework Directive)

HP3, HP4, HP14

#### **SECTION 14: TRANSPORT INFORMATION**

14.1	UN number or ID number	ADR/RID UN 1863	IMDG/ADN UN 1863
14.2	UN proper shipping name	FUEL, AVIATION, TURBINE ENGINE	FUEL, AVIATION, TURBINE ENGINE
14.3	Transport hazard class(es)	3	3 (N2, F)
14.4	Packing group	III	III
14.5	Environmental hazards	Environmentally hazardous substance	Classified as a Marine Pollutant.
14.6	Special precautions for user	See Section: 2	
14.7	Maritime transport in bulk according to IMO instruments	No information available.	No information available.
14.8	Additional information	HIN: 30	EmS: F-E, S-E
		Tunnel restriction code: 3 D/E Limited Quantity: 5L Special provisions: 664	Limited Quantity: 5L

#### **SECTION 15: REGULATORY INFORMATION**

15.1 Safety, health and environmental

regulations/legislation specific for the substance or mixture

15.1.1 **EU regulations** 

> Seveso Upper Tier: 25000 tonnes

> > Page: 7 of 26

Revision: 24 March 2023 Version: 006

#### 3.2 Environmental exposure prediction

Exposure assessment (method/calculation model)

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

Kerosine is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Environmental exposure	STP	freshwater	marine water	soil	freshwater sediment	marine sediment
Predicted Environmental Exposure (PEC)	6.7E-03 mg/L	6.9E-03 mg/L	6.7E-05 mg/L	2.6E-03 mg/kg ww	7.2E-02 mg/kg ww	1.1E-03 mg/kg ww

Technical onsite conditions and measures to reduce or limit of	discharges, air emissions and releases to soil		
Risk from environmental exposure is driven by freshwater sedime	nt.		
If discharging to domestic sewage treatment plant, no onsite wast	ewater treatment required.		
Treat air emission to provide a typical removal efficiency of (%):	95		
Treat onsite wastewater (prior to receiving water discharge) to	04.0		
provide the required removal efficiency of (%):	94.2		
If discharging to domestic sewage treatment plant, provide the	0		
required onsite wastewater removal efficiency of (%):	0		
Treat soil emission to provide a typical removal efficiency of (%):	Not defined		
Common practices vary across sites thus conservative process re	lease estimates used. If discharging to domestic sewage treatment plant, no onsite		
wastewater treatment required.			
Organisational measures to prevent/limit release from site			
Do not apply industrial sludge to natural soils. Sludge should be in	cinerated, contained or reclaimed.		
Conditions and measures related to municipal sewage treatment	nent plant		
Size of municipal sewage system/treatment plant (m³/d)	2000		
Degradation effectiveness (%)	95		
Conditions and measures related to external treatment of waste for disposal			
Combustion emissions limited by required exhaust emission controls. Combustion emissions considered in regional exposure assessment. External			
treatment and disposal of waste should comply with applicable local and/or national regulations.			
Substance release quantities after risk management measures			
Release to waste water from process (mg/l)	Not defined		
Maximum allowable site tonnage (MSafe) based on release	2.1E+06		
following total wastewater treatment removal (kg/d):

#### 3.2 Environmental exposure prediction

Exposure assessment (method/calculation model)

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

Kerosine is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Product characteristics			
Physical form of product	Liquid		
Vapour pressure	0.5 - 10 kPa @ STP		
Concentration of substance in product	Covers percentage subs	stance in the product up to 100 % (unless stated differently).	
Human factors not influenced by risk m	anagement		
Potential exposure area	Not defined		
Frequency and duration of use	<u>.</u>		
Exposure duration per day	Covers daily exposures up to 8 hours (unless stated differently).		
Frequency of use (days per year)	365		
Other operational conditions affecting v	vorker exposure		
Area of use	PROC8b (bulk)	Outdoor	
Area of use	All other PROC's	Indoor	
Characteristics of the surroundings	Not defined		

Assumes use at not more than 20°C above ambient temperature, unless stated differently. Assumes a good basic standard of occupational hygiene is implemented.

#### General measures (skin irritants)

Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent/minimise exposures and to report any skin problems that may develop.

prevent/minimise exposures and to repo	ort any skin problems that may develop.			
Technical conditions of use				
Not defined				
Organisational measures				
PROC8b (Bulk)	Ensure operatives are trained to minimise exposures.(Efficiency of at least 15%)			
PROC8b (Drum/batch transfers)	Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour). (Efficiency of at least 30 %).			
PROC8a (Maintenance)	Drain down system prior to equipment break-in or maintenance. (Efficiency of at least 80 %).			
PROC8a (Cleaning)	PROC8a (Cleaning)  Apply vessel entry procedures including use of forced supplied air. (Efficiency of at least 80 %).			
Risk management measures related	to human health			
Respiratory protection	No special measures are required.			
Hand and/or Skin protection	No special measures are required.			
Eye Protection	No special measures are required.			
Other operational conditions affecting	g worker exposure			
Handle substance within a closed syste	m. (PROC2 (General exposures); PROC3; PROC16).			

Revision: 24 March 2023 Version: 006

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2020/878

**JET KEROSENE V3013** 

Ensure operation is undertaken outdoors.(PROC8b (Bulk)).

Ensure material transfers are under containment or extract ventilation. (PROC8b (Bulk)).

Clear lines prior to de-coupling. (PROC8b (Bulk)).

Use drum pumps or carefully pour from container. (PROC8b (Drum/batch transfers)).

Avoid spillage when withdrawing pump. (PROC8b (Drum/batch transfers)).

Clear spills immediately. (PROC8a (Maintenance)).

Transfer via enclosed lines. (PROC8a (Cleaning)).

Store substance within a closed system. (PROC2 (Storage)).

Avoid dip sampling.(PROC2 (Storage)).

Provide a good standard of general ventilation. Natural ventilation is from doors, windows etc. Controlled ventilation means air is supplied or removed by a powered fan. (PROC8b (Drum/batch transfers)).

Retain drain downs in sealed storage pending disposal or for subsequent recycle. (PROC8a (Maintenance); PROC8a (Cleaning)).

Ensure dedicated sample points are provided.(PROC2 (Storage)).

Effsure dedicated sample points are provided.(PROG2 (Storage)).
