Revision: 6.1 Date: 10.06.2019

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

## SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 Product identifier

Product Name Fuel oil, residual

Product Description V2010-LOW SULFUR STRAIGHT RUN FO-Fuel oil, residual

Trade Name LOW SULFUR STRAIGHT RUN FO

 Product code
 LSSR, V2010

 CAS No.
 68476-33-5

 EC No.
 270-675-6

REACH Registration No.

1.2 Relevant identified uses of the substance or mixture

and uses advised against

No.Exposure ScenarioPage:1Distribution of Fuel oil, residual112Formulation and (re)packing of Fuel oil, residual153Use of Fuel oil, residual as a Fuel (Industrial)194Use of Fuel oil, residual as a Fuel (Professional)22

Uses Advised Against Anything other than the above.

1.3 Details of the supplier of the safety data sheet

Company Identification Vitol SA

Place des Bergues 3 P.O. Box 2056 1211 Geneva 1 Switzerland

 Telephone
 +31 10 498 7200

 Fax
 +31 10 452 9545

 E-Mail (competent person)
 xrea ch@vitol.com

1.4 Emergency telephone number

Emergency Phone No. +44 (0) 1235 239 670, 24/7
Languages spoken All official European languages.

### **SECTION 2: HAZARDS IDENTIFICATION**

### 2.1 Classification of the substance or mixture

**2.1.1 Regulation (EC) No. 1272/2008 (CLP)** Asp. Tox. 1; H304

Acute Tox. 4; H332 Carc. 1B; H350 Repr. 2; H361d

STOT RE 2; H373 (Thymus, Liver, blood effects)

Aquatic Acute 1; H400 Aquatic Chronic 1; H410

2.2 Label elements According to Regulation (EC) No. 1272/2008 (CLP)

Product Description V2010-LOW SULFUR STRAIGHT RUN FO-Fuel oil, residual

Hazard Pictogram(s)

Danger

Revision: 6.1 Date: 10.06.2019

## ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

Hazard Statement(s)

H304: May be fatal if swallowed and enters airways.

H332: Harmful if inhaled. H350: May cause cancer.

H361d: Suspected of damaging the unborn child.

H373: May cause damage to organs through prolonged or repeated exposure:

Thymus, Liver, blood effects

H410: Very toxic to aquatic life with long lasting effects.

Precautionary Statement(s) P201: Obtain special instructions before use.

P260: Do not breathe dust/fume/gas/mist/vapours/spray. P281: Use personal protective equipment as required.

P301+P310: IF SWALLOWED: Immediately call a POISON CENTER or

doctor/physician.

P331: Do NOT induce vomiting.
P273: Avoid release to the environment.

Supplemental information EUH066: Repeated exposure may cause skin dryness or cracking.

Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances. Remove contaminated clothing and wash clothing before reuse. Vapour may create explosive atmosphere. The vapour is heavier than air;

beware of pits and confined spaces.

## **SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS**

### 3.1 Substances

Other hazards

2.3

SUBSTANCE	CAS No.	EC No.	REACH Registration No.	%W/W		
Fuel oil, residual	68476-33-5	270-675-6	-	100		

## SECTION 4: FIRST AID MEASURES

### 4.1 Description of first aid measures

Self-protection of the first aider

H2S Warning:

Inhalation

Skin Contact

Eye Contact

Ingestion

The vapour is heavier than air; beware of pits and confined spaces. If it is suspected that fumes are still present, the responder should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Avoid all contact. Do not ingest. If swallowed then seek immediate medical assistance.

Hydrogen sulphide (H2S) can accumulate in the headspace of storage tanks and reach potentially hazardous concentrations.

If there is any suspicion of inhalation: A self contained breathing apparatus should be worn. Remove to fresh air immediately.

IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. If symptoms persist, obtain medical attention.

IF ON SKIN (or hair): Remove contaminated clothing immediately and drench affected skin with plenty of water, then wash with soap and water. If irritation (redness, rash, blistering) develops, get medical attention.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice/attention.

IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the lungs. If vomiting occurs spontaneously, keep head below hips to prevent

Revision: 6.1 Date: 10.06.2019

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

4.2 Most important symptoms and effects, both acute and delayed

aspiration into the lungs. If unconscious, place in recovery position and get medical attention immediately. Do not give anything by mouth to an unconscious person. Get medical attention immediately. Do not wait for symptoms to appear. Inhalation: Vapour may be irritant to the respiratory tract.

Skin Contact: Repeated and/or prolonged skin contact may cause irritation.

Eye Contact: May cause eye irritation.

Ingestion: Aspiration hazard. Aspiration into the lungs may cause chemical pneumonitis, which can be fatal.

If breathing is laboured, oxygen should be administered by qualified personnel. In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).

IF INHALED: If unconscious, place in recovery position and get medical attention immediately. Administer oxygen if available and artificial respiration if necessary.

IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the lungs. If aspiration is suspected obtain immediate medical attention. If vomiting occurs spontaneously, keep head below hips to prevent aspiration into the lungs.

Indication of any immediate medical attention and 4.3

Notes to a physician:

special treatment needed

## SECTION 5: FIREFIGHTING MEASURES

5.1 Extinguishing media

> Suitable Extinguishing media Unsuitable extinguishing media

5.2 Special hazards arising from the substance or mixture

5.3 Advice for fire-fighters Foam, Carbon dioxide, Water fog or dry powder.

Do not use water jet. Direct water jet may spread the fire.

Not flammable but will support combustion. The vapour is heavier than air; beware of pits and confined spaces. Will float and can be reignited on surface water. Decomposes in a fire giving off toxic fumes: A mixture of solid and liquid particulates and gases including unidentified organic and inorganic compounds. If sulphur compounds are present in appreciable amounts, combustion products may include also H2S and SOx (sulfur oxides) or sulfuric acid

Fight fire with normal precautions from a reasonable distance. Fire fighters should wear complete protective clothing including self-contained breathing apparatus. Keep containers cool by spraying with water if exposed to fire. Avoid release to the environment. Dike fire control water for later disposal.

## **SECTION 6: ACCIDENTAL RELEASE MEASURES**

6.1 Personal precautions, protective equipment and emergency procedures

H2S Warning:

Small spillages: Large spillages:

6.2 **Environmental precautions** 

6.3 Methods and material for containment and cleaning up

Caution - spillages may be slippery. Ensure operatives are trained to minimise exposures. Ensure suitable personal protection during removal of spillages. Eliminate sources of ignition. Shut off leaks if without risk. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid all contact with substance. Ensure adequate ventilation. Do not breathe vapour. Do not ingest. If swallowed then seek immediate medical assistance. Do not use sparking tools.

Product may release Hydrogen Sulphide. Exposure controls - These controls may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H2S alarms, Personal H2S alarms, Personal escape sets, H2S awareness training. Please see section 8 for appropriate personal protection equipment

Wear flame-resistant antistatic protective clothing.

Evacuate the area and keep personnel upwind. Drench contaminated clothing with water before removing to avoid risk of sparks from static electricity. Avoid all contact. Wear chemical protection suit and breathing apparatus. See Also Section: 8.

Avoid release to the environment. Do not allow to enter drains, sewers or watercourses. Spillages or uncontrolled discharges into watercourses must be alerted to the Environment Agency or other appropriate regulatory body. If necessary: Dike area to contain the spill and prevent releases to sewers, drains, or other waterways.

Provided it is safe to do so, isolate the source of the leak. The vapour is heavier than air; beware of pits and confined spaces. Ensure that the equipment is

Revision: 6.1 Date: 10.06.2019

Spillages onto land:

adequately grounded. Allow small spillages to evaporate provided there is adequate ventilation.

In case of soil contamination, remove contaminated soil and treat in accordance with local regulations. Adsorb spillages onto sand, earth or any suitable adsorbent material. Transfer to a lidded container for disposal or recovery.

**Small spillages:** Allow small spillages to evaporate provided there is adequate ventilation. Wear flame-resistant antistatic protective clothing.

Large spillages: Cover spillage with foam to reduce evaporation. Do not use water jet.

Collect as much as possible in clean container for reuse or disposal.

Dispose of this material and its container as hazardous waste.

**Small spillages:** Contain product with floating barriers or other equipment. Collect spilled product by absorbing with specific floating absorbents.

Large spillages: Open waters should be contained with floating barriers or other mechanical means and recovered, only if this is strictly necessary and if fire/explosion risks can be adequately prevented. Otherwise control the spreading of the spillage, and let the substance evaporate naturally.

See Section: 8,13

Spillages on water or at sea:

6.4 Reference to other sections

## **SECTION 7: HANDLING AND STORAGE**

7.1 Precautions for safe handling

H2S Warning:

7.2 Conditions for safe storage, including any incompatibilities

Storage temperature Storage measures

Incompatible materials
7.3 Specific end use(s)

Obtain special instructions before use. Keep away from sources of ignition - No smoking. Use only outdoors or in a well-ventilated area. Prevent vapour build up by providing adequate ventilation during and after use. Take action to prevent static discharges. Use non-sparking tools. All parts of the plant and equipment should be electrically bonded together and connected to earth. Electrical continuity should be checked at regular intervals. Antistatic clothing and footwear should be used. The vapour is heavier than air; beware of pits and confined spaces. Avoid all contact with substance. Do not ingest. If swallowed then seek immediate medical assistance. Do not breathe vapour. See Section: 8. Keep good industrial hygiene. Wash hands thoroughly after handling. Contaminated clothing should be thoroughly cleaned.

Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances. These controls may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H2S alarms, Personal H2S alarms, Personal escape sets, H2S awareness training.

Light hydrocarbon vapours can build up in the headspace of containers. These can cause flammability / explosion hazards. Bund storage facilities to prevent soil and water pollution in the event of spillage. Keep only in original packaging. Keep containers properly sealed when not in use. Protect from sunlight. Containers of this material may be hazardous when empty since they retain product residue. Empty container may contain product residue which may result in flammable or explosive vapours inside the container.

Stable at ambient temperatures.

Suitable containers: Stainless steel, Mild steel Unsuitable containers: Synthetic materials

Keep away from oxidising agents.

See Section: 1.2 and/or Exposure Scenario.

## SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Control parameters

8.1.1 Occupational Exposure Limits

No Occupational Exposure Limit assigned. Users are advised to consider national Occupational Exposure Limits or other equivalent values.

8.1.2 Biological limit value

Not established.

Page: 4 of 25

Revision: 6.1 Date: 10.06.2019

## ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

### 8.1.3 PNECs and DNELs

PNEC: Fuel Oil, Residual is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Fuel Oil, Residual Derived No Effect Level	Oral	Inhalation Dermal		
Worker - Long Term - Systemic effects	0.015 mg/kg bw/day	0.18 mg/m <sup>3</sup>	0.065 mg/kg bw/day	
Worker - Short term - Systemic effects	-	4700 mg/m <sup>3</sup>	-	

### 8.2 Exposure controls

## 8.2.1 Appropriate engineering controls

Provide adequate ventilation, including appropriate local extraction if dusts, fumes or vapours are likely to be evolved. Store in a cool/low-temperature, well-ventilated (dry) place away from heat and ignition sources. Guarantee that the eye flushing systems and safety showers are located close to the working place.

# 8.2.2 Individual protection measures, such as personal protective equipment (PPE)

Protective clothing should be selected specifically for the working place, depending on concentration and quantity of the hazardous substances handled. The resistance of the protective clothing to chemicals should be ascertained with the respective supplier.

Fuels are typically used, transferred and transported in closed systems. If exposure is likely (i.e. during sampling) the following advice may be appropriate. Keep good industrial hygiene. Always wash hands before smoking, eating and drinking. Do not eat, drink or smoke at the work place.

Refer to annexes for exposure scenarios detailing use specific exposure controls

Use eye protection according to EN 166, designed to protect against liquid splashes.

Eye/ face protection

Skin protection

**Hand protection:** Wear impervious gloves (EN374). Gloves should be changed regularly to avoid permeation problems. Breakthrough time of the glove material: refer to the information provided by the gloves' producer.

Recommended: Nitrile rubber.

Body protection: Wear anti-static clothing and shoes.

small scale: Wear suitable coveralls to prevent exposure to the skin.

large scale: Chemical protection suit.

When the product is heated /In case of inadequate ventilation wear respiratory protection. The use of a high efficiency filter (EN143) is recommended. Filter type A2

Closed system(s): Not normally required.

Not applicable.

8.2.3 Environmental Exposure Controls Avoid release to the environment.

## Respiratory protection

Thermal hazards

Revision: 6.1 Date: 10.06.2019

### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

Initial boiling point and boiling range  $$>350\ ^{\circ}\text{C}$$  Flash point  $$>60\ ^{\circ}\text{C}$$ 

Evaporation rate Not established .
Flammability (solid, gas) Not applicable - Liquid
Upper/lower flammability or explosive limits Not established.
Vapour pressure 0.5 kPa @ 20°C

Vapour pressure 0.5 kPa @ Vapour density 5.1 (Air=1)

Relative density 0.80 - 0.99 g/cm³ @ 15 °C

Solubility(ies) Water: 0.4 mg/l @ 22 °C Slightly soluble.

Partition coefficient: n-octanol/water 2.7 – 6 log P
Auto-ignition temperature > 225 °C
Decomposition Temperature Not established.

Viscosity 7 – 20.5 mm²/s @ 40 °C (<60 mm²/s @ 100 °C)

Explosive properties Not explosive. (Vapour may create explosive atmosphere.)

Oxidising properties Not oxidising.

**9.2 Other information** None known.

## **SECTION 10: STABILITY AND REACTIVITY**

10.1 Stability and reactivity Stable under normal conditions. Reacts with - Strong oxidising agents

10.2 Chemical stability Stable under normal conditions. Hazardous polymerisation will not occur.

Product may release Hydrogen Sulphide.

10.3 Possibility of hazardous reactions Vapours are heavier than air and may travel considerable distances to a source

of ignition and flashback. Product may release Hydrogen Sulphide.

**10.4 Conditions to avoid** Elevated temperature: > 50 °C

Keep away from heat, sources of ignition and direct sunlight.

10.5 Incompatible materials Keep away from oxidising agents. Strong Acids and Alkalis.

10.6 Hazardous decomposition product(s)

A mixture of solid and liquid particulates and gases including unidentified

organic and inorganic compounds. Decomposes in a fire giving off toxic fumes:

COx, H2S, SOx,

## **SECTION 11: TOXICOLOGICAL INFORMATION**

mentioned.

**Acute toxicity - Ingestion**Based upon the available data, the classification criteria are not met.

LD50 (oral,rat) mg/kg: >2000 (OECD 401)

Acute toxicity - Inhalation Acute Tox. 4; Harmful if inhaled.

LC50 (inhalation,rat) mg/l/4h: 4.1 (EPA OTS 798.1150)

**Acute toxicity - Skin Contact**Based upon the available data, the classification criteria are not met.

LD50 (skin,rabbit) mg/kg: >2000 (OECD 434)

**Skin corrosion/irritation**Based upon the available data, the classification criteria are not met.

Not irritating to skin. (rabbit) (OECD 404)

EUH066: Repeated exposure may cause skin dryness or cracking. (rat) (OECD

410)

Serious eye damage/irritation Based upon the available data, the classification criteria are not met.

Not irritating to eyes. (rabbit) (EU Method B.5)

Respiratory or skin sensitization

Based upon the available data, the classification criteria are not met.

Sensitisation (guinea pig) - Negative (OECD 406)

Germ cell mutagenicity

Based upon the available data, the classification criteria are not met.

ECHA Registration Endpoint summary:

Not classified. Studies showed no consistent evidence of mutagenic activity.

Carcinogenicity Carc. 1B; May cause cancer.

ECHA Registration Endpoint summary:

Positive (mouse)

Reproductive toxicity Repr. 2; H361d: Suspected of damaging the unborn child.

ECHA Registration Endpoint summary: Reproductive toxicity: Negative Developmental toxicity: Positive

STOT - single exposure Based upon the available data, the classification criteria are not met.

exposure.

Oral: No data Inhalation: No data

Dermal: NOAEL 1.06 mg/kg bw/day (rat) (OECD 410)

Asp. Tox. 1; May be fatal if swallowed and enters airways. Viscosity: 7 – 20.5 mm²/s @ 40 °C (<60 mm²/s @ 100 °C)

11.2 Other information None.

## **SECTION 12: ECOLOGICAL INFORMATION**

**12.1 Toxicity** Aquatic Acute 1; Very toxic to aquatic life.

Aquatic Chronic 1; Very toxic to aquatic life with long lasting effects.

EL50 48hr (Daphnia magna) 0.22 mg/l (OECD 202)

The aquatic toxicity was estimated using the PETROTOX computer model.

Estimated: 0.1 mg/l (Fish)

12.2 Persistence and degradibility Substance is complex UVCB. Standard tests for this endpoint are intended for

single substances and are not appropriate for this complex substance.

Substance is complex UVCB. Standard tests for this endpoint are intended for

single substances and are not appropriate for this complex substance.

Substance is complex UVCB. Standard tests for this endpoint are intended for

single substances and are not appropriate for this complex substance.

Results of PBT and vPvB assessment Not classified as PBT or vPvB.

12.6 Other adverse effects None known.

## **SECTION 13: DISPOSAL CONSIDERATIONS**

13.1 Waste treatment methods

Mobility in soil

Do not empty into drains, dispose of this material and its container at hazardous or special waste collection point. Disposal should be in accordance with local, state or national legislation. Containers of this material may be hazardous when empty since they retain product residue. Containers must not be punctured or destroyed by burning, even when empty. Allocation of a waste code number, according to the European Waste Catalogue, should be carried out in agreement with the regional waste disposal company. Waste code: Fuel Oil (13 07 01)

IMDG/ADN

## 3.2 Environmental exposure prediction

Exposure assessment (method/calculation model)

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

Fuel oil, residual is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Environmental exposure	STP	Freshwater	Marine water	Soil	Freshwater sediment	Marine sediment
Predicted Environmental Exposure (PEC)	1.9E-03 mg/l	1.9E-04 mg/l	1.9E-05 mg/l	6.2E-02 mg/kg ww	1.4E+00 mg/kg ww	3.7E-02 mg/kg ww
Risk characterisation ratio (RCR)	2.0E-03	7.6E-03	7.6E-04	3.3E-05	1.3E-02	9.9E-04

Human exposure prediction:

Route of Exposure	Exposure (μg/kg/Day)	Risk characterisation ratio (RCR)
Oral	2.0E+01	7.7E-01
Inhalation	1.6E-01	3.2E-03

4. Evaluation guidance to downstream user					
For scaling see	Where other Risk Management Measures/Operational Conditions are adopted, then users should eare managed to at least equivalent levels.  Available hazard data do not support the need for a DNEL to be established for other health effects. Further details on scaling and control technologies are provided in SpERC factsheet (http://cefic.cindustries-libraries.html).

## General measures applicable to all activities

Assumes a good basic standard of occupational hygiene is implemented. Assumes activities are at ambient temperature (unless stated differently).

## General measures (carcinogens)

Consider technical advances and process upgrades (including automation) for the elimination of releases. minimise exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation. Drain down systems and clear transfer lines prior to breaking containment. Clean/flush equipment, where possible, prior to maintenance Where there is potential for exposure: restrict access to authorised persons; provide specific activity training to operators to minimise exposures; wear suitable gloves and coveralls to prevent skin contamination; wear respiratory protection when its use is identified for certain contributing scenario; clear up spills immediately and dispose of waste safely. Ensure safe systems of work or equivalent arrangements are in place to manage risks. Regularly inspect, test and maintain all control measures. Consider the need for risk based health surveillance.

Technical conditions of use			
PROC1, PROC2, PROC3	Handle substance within a closed system.		
Organisational measures			
PROC2, PROC3, PROC8b (Bulk), PROC8b (Drum)	Provide a good standard of controlled ventilation (10 to 15 air changes per hour).		
PROC2 (Storage), PROC8a (Maintenance), PROC16	Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour).		
PROC8b (Bulk), PROC8b (Drum)	Ensure material transfers are under containment or extract ventilation. Clear transfer lines prior to

	de-coupling.				
PROC8b (Bulk), PROC8b (Drum), PROC8a (Maintenance)	Retain drain downs in sealed storage pending disposal or for subsequent recycle.				
Risk management measures related to hun	nan health				
Respiratory protection	No special measures are required.				
PROC1, PROC3, PROC3, PROC8b (Dr. (Refuelling),		Storage), (Bulk),	Wear chemically resistant gloves (tested to EN374) in combination with 'basic' employee training (Efficiency of at least 90 %).		
	PROC2, PROC8a (Maintenance)		Wear chemically resistant gloves (tested to EN374) in combination with specific activity training (Efficiency of at least 95 %).		
Eye Protection	No special measur	es are required.			
2.2 Control of environmental exposure					
Amounts used					
Fraction of EU tonnage used in region:		0.1			
Regional use tonnage (tons/year):		1.7E+06			
Fraction of Regional tonnage used locally (ton	s/year):	5.0E-04			
Annual site tonnage (tons/year):	· ,	8.5E+02			
Maximum daily site tonnage (kg/day):		2.3E+03			
Environment factors not influenced by risk	management				
Flow rate of receiving surface water (m³/d):	<b>J</b>	Not define	d (default = 18,000)		
Local freshwater dilution factor:		10	a (as.as. 10,000)		
Local marine water dilution factor:		100			
Operational conditions		100			
Emission days (days/year):		365			
Release fraction to air from wide dispersive us	e (regional only):	1.0E-05			
Release fraction to wastewater from wide disp		1.0E-07			
Release fraction to wastewater from wide dispersive use. 1.0E-07  Release fraction to soil from wide dispersive use (regional only): 1.0E-05					
Technical conditions and measures at pro-		to prevent	release		
Common practices vary across sites thus cons	servative process re	ease estima	ates used.		
Technical onsite conditions and measures	to reduce or limit of	discharges,	air emissions and releases to soil		
			primarily ingestion). No wastewater treatment required.		
Treat air emission to provide a typical removal		Not applicable			
Treat onsite wastewater (prior to receiving water discharge) to					
provide the required removal efficiency of (%):		0			
If discharging to domestic sewage treatment p					
	required onsite wastewater removal efficiency of (%):		0		
Treat soil emission to provide a typical remova	al efficiency of (%):	Not defined			
Common practices vary across sites thus cons		ease estima	ates used.		
Organisational measures to prevent/limit re					
Do not apply industrial sludge to natural soils. Sludge should be incinerated, contained or reclaimed.					
Conditions and measures related to municipal sewage treatment plant					
Size of municipal sewage system/treatment plant (m³/d):		2.0E+03			
Degradation effectiveness (%):		94.2			
Conditions and measures related to external treatment of waste for disposal					
Combustion emissions limited by required exhaust emission controls. Combustion emissions considered in regional exposure assessment. External					
treatment and disposal of waste should comply with applicable local and/or national regulations.					
Conditions and measures related to external treatment of waste for disposal					
This substance is consumed during use and no waste of the substance is generated.					
Substance release quantities after risk management measures					
			Not defined		
Maximum allowable site tonnage (MSafe) based on release			3.0E+03		
following total wastewater treatment removal (kg/d):					

3. Exposure estimation and reference to its source	
3.1 Human exposure prediction	
Exposure assessment (method/calculation model)	The ECETOC TRA tool has been used to estimate workplace exposures unless
	otherwise indicated. (PROC1, PROC2, PROC3, PROC16).
	The Advanced REACH Tool (ART) has been used to estimate workplace

## 3.2 Environmental exposure prediction

Exposure assessment (method/calculation model)

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

Fuel oil, residual is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Environmental exposure	STP	Freshwater	Marine water	Soil	Freshwater sediment	Marine sediment
Predicted Environmental Exposure (PEC)	7.2E-06 mg/l	1.1E-04 mg/l	7.3E-07 mg/l	6.2E-02 mg/kg ww	1.4E+00 mg/kg ww	3.6E-02 mg/kg ww
Risk characterisation ratio (RCR)	7.5E-06	4.7E-03	6.2E-05	5.7E-05	3.5E-03	4.1E-05

Human exposure prediction:

Route of Exposure	Exposure (μg/kg/Day)	Risk characterisation ratio (RCR)
Oral	2.0E+01	7.7E-01
Inhalation	1.2E-01	2.3E-03

4. Evaluation guidance to downstream user
