Revision: 4.1 Date: 10.06.2019

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

### SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1	Product identifier Product Name Product Description Trade Name Product code CAS No. EC No. REACH Registration No.	-	7-PREMIUM UNLEADED-Gasoline MUM UNLEADED JNL )-81-5	
1.2	Relevant identified uses of the substance or mixture and uses advised against			
	Identified Use(s)	No.	Exposure Scenario	Page:
		1	Distribution of Gasoline $(0 - 1 \%$ benzene content)	12
		2	Formulation and (re)packing of Gasoline $(0 - 1 \% benzene$	15
		3	content) Use of Gasoline (0 – 1 % benzene content) as a fuel - Industrial	18
		4	Use of Gasoline $(0 - 1 \%$ benzene content) as a fuel -	21
		5	Professional Use of Gasoline (0 – 1 % benzene content) as a fuel - Consumer	24
	Uses Advised Against	Anyth	ing other than the above.	
1.3	Details of the supplier of the safety data sheet			
	Company Identification	Vitol S	SA	
			des Bergues 3	
		-	Box 2056 Geneva 1	
			erland	
	Telephone	+31 1	0 498 7200	
	Fax	+31 1	0 452 9545	
	E-Mail (competent person)	xrea	ch@vitol.com	
1.4	Emergency telephone number			
	Emergency Phone No.		0) 1235 239 670, 24/7	
	Languages spoken	All off	icial European languages.	

### **SECTION 2: HAZARDS IDENTIFICATION**

2.1 Classification of the substance or mixture

2.1.1 Regulation (EC) No. 1272/2008 (CLP)

Flam. Liq. 1; H224 Asp. Tox. 1; H304 Skin Irrit. 2; H315 Muta. 1B; H340 Carc. 1B; H350 Repr. 2; H361fd STOT SE 3; H336 (Central nervous system, Inhalation) Aquatic Chronic 2; H411

According to Regulation (EC) No. 1272/2008 (CLP) V4047-PREMIUM UNLEADED-Gasoline

Revision: 4.1 Date: 10.06.2019

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

H	azard Pictogram(s)	
Si	ignal Word(s)	Danger
H	azard Statement(s)	<ul> <li>H224: Extremely flammable liquid and vapour.</li> <li>H304: May be fatal if swallowed and enters airways.</li> <li>H315: Causes skin irritation.</li> <li>H340: May cause genetic defects.</li> <li>H350: May cause cancer.</li> <li>H361fd: Suspected of damaging fertility. Suspected of damaging the unborn child.</li> <li>H336: May cause drowsiness or dizziness. (Central nervous system, Inhalation)</li> <li>H411: Toxic to aquatic life with long lasting effects.</li> </ul>
Pi	recautionary Statement(s)	<ul> <li>P201: Obtain special instructions before use.</li> <li>P210: Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P273: Avoid release to the environment.</li> <li>P280: Wear protective gloves/protective clothing/eye protection/face protection.</li> <li>P301+P310: IF SWALLOWED: Immediately call a POISON CENTER/doctor.</li> <li>P331: Do NOT induce vomiting.</li> <li>P403+P233: Store in a well-ventilated place. Keep container tightly closed.</li> </ul>
2.3 O	ther hazards	May form explosive mixture with air. The vapour is heavier than air; beware of pits and confined spaces. May cause irritation to eyes and air passages. Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances.

### SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1 Substances

SUBSTANCE	CAS No.	EC No.	%W/W	
Gasoline	86290-81-5	289-220-8	100	

## **SECTION 4: FIRST AID MEASURES**

4.1 Description of first aid measures Self-protection of the first aider

H2S Warning:

Inhalation

Eliminate sources of ignition. If it is suspected that fumes are still present, the responder should wear an appropriate mask or self-contained breathing apparatus. Drench contaminated clothing with water before removing to avoid risk of sparks from static electricity. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Avoid all contact. Do not ingest. If swallowed then seek immediate medical assistance.

Hydrogen sulphide (H2S) can accumulate in the headspace of storage tanks and reach potentially hazardous concentrations.

If there is any suspicion of inhalation: A self contained breathing apparatus should be worn. Remove to fresh air immediately.

IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight

Revision: 4.1 Date: 10.06.2019

### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

	Skin Contact	clothing such as a collar, tie, belt or waistband. Get medical advice/attention if you feel unwell. IF ON SKIN (or hair): Remove contaminated clothing immediately and wash affected skin with plenty of water or soap and water. If irritation (redness, rash,
	Eye Contact	blistering) develops, get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice/attention.
	Ingestion	IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the lungs. If vomiting occurs spontaneously, keep head below hips to prevent aspiration into the lungs. If unconscious, place in recovery position and get medical attention immediately. Do not give anything by mouth to an unconscious person. Get medical attention immediately. Do not wait for symptoms to appear.
4.2	Most important symptoms and effects, both acute and delayed	Inhalation: May cause drowsiness or dizziness. Headache, nausea and vomiting. Skin Contact: Causes skin irritation. Eye Contact: Causes serious eye irritation. Ingestion: Aspiration into the lungs may cause chemical pneumonitis, which can be fatal. Ingestion may cause irritation of the gastrointestinal tract. Nausea, Vomiting and Diarrhoea.
4.3	Indication of any immediate medical attention and special treatment needed Notes to a physician:	Treat symptomatically. IF INHALED: If unconscious, place in recovery position and get medical attention immediately. Administer oxygen if available and artificial respiration if
		necessary. IF SWALLOWED: Do not induce vomiting because of risk of aspiration into the lungs. If aspiration is suspected obtain immediate medical attention. If vomiting occurs spontaneously, keep head below hips to prevent aspiration into the lungs.

### SECTION 5: FIREFIGHTING MEASURES

5.1	Extinguishing media	
	Suitable Extinguishing media	Extinguish with sand or dry chemical. Foam, Carbon dioxide, Water fog or dry powder
	Unsuitable extinguishing media	Do not use water jet. Direct water jet may spread the fire.
5.2	Special hazards arising from the substance or mixture	Extremely flammable liquid and vapour. Will float and can be reignited on surface water. Decomposes in a fire giving off toxic fumes: A mixture of solid and liquid particulates and gases including unidentified organic and inorganic compounds. May form explosive mixture with air. Prevent liquid entering sewers, basements and any watercourses. Vapours are heavier than air and may travel considerable distances to a source of ignition and flashback. If sulphur compounds are present in appreciable amounts, combustion products may include also H2S and SOx (sulfur oxides) or sulfuric acid
5.3	Advice for fire-fighters	Fight fire with normal precautions from a reasonable distance. Fire fighters should wear complete protective clothing including self-contained breathing apparatus. Keep containers cool by spraying with water if exposed to fire. Avoid release to the environment. Dike fire control water for later disposal.

## SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1	Personal precautions, protective equipment and emergency procedures	Caution - spillages may be slippery. Ensure operatives are trained to minimise exposures. Ensure suitable personal protection during removal of spillages. Eliminate sources of ignition. Shut off leaks if without risk. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid all contact with substance. Ensure adequate ventilation. Do not breathe vapour. Do not ingest. If swallowed then seek immediate medical assistance. All official European languages. Do not use sparking tools. Use non-sparking ventilation systems, approved explosion-proof equipment, and intrinsically safe electrical systems.
	H2S Warning:	Product may release Hydrogen Sulphide. Exposure controls - These controls

Revision: 4.1 Date: 10.06.2019

### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

	Small spillages: Large spillages:	may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H2S alarms, Personal H2S alarms, Personal escape sets, H2S awareness training. Please see section 8 for appropriate personal protection equipment Wear flame-resistant antistatic protective clothing. Evacuate the area and keep personnel upwind. Drench contaminated clothing with water before removing to avoid risk of sparks from static electricity. Avoid all contact. Wear chemical protection suit and breathing apparatus. See Also Section: 8.
6.2	Environmental precautions	Avoid release to the environment. Do not allow to enter drains, sewers or watercourses. Spillages or uncontrolled discharges into watercourses must be alerted to the Environment Agency or other appropriate regulatory body. If necessary: Dike area to contain the spill and prevent releases to sewers, drains, or other waterways.
6.3	Methods and material for containment and cleaning up	Provided it is safe to do so, isolate the source of the leak. Use non-sparking equipment when picking up flammable spill. The vapour is heavier than air; beware of pits and confined spaces. Ensure that the equipment is adequately grounded. Allow small spillages to evaporate provided there is adequate ventilation. Wear flame-resistant antistatic protective clothing. Wear chemical protection suit and breathing apparatus.
	Spillages onto land:	In case of soil contamination, remove contaminated soil and treat in accordance with local regulations. Adsorb spillages onto sand, earth or any suitable adsorbent material. Transfer to a lidded container for disposal or recovery. Dispose of this material and its container as hazardous waste. <b>Small spillages:</b> Allow small spillages to evaporate provided there is adequate ventilation. Wear flame-resistant antistatic protective clothing. <b>Large spillages:</b> Cover spillage with foam to reduce evaporation. Do not use water jet.
	Spillages on water or at sea:	Collect as much as possible in clean container for reuse or disposal. <b>Small spillages:</b> Contain product with floating barriers or other equipment. Collect spilled product by absorbing with specific floating absorbents. <b>Large spillages:</b> Open waters should be contained with floating barriers or other mechanical means and recovered, only if this is strictly necessary and if fire/explosion risks can be adequately prevented. Otherwise control the spreading of the spillage, and let the substance evaporate naturally.
6.4	Reference to other sections	See Section: 8,13

## SECTION 7: HANDLING AND STORAGE

7.1	Precautions for safe handling H2S Warning:	Obtain special instructions before use. Keep away from sources of ignition - No smoking. Use only outdoors or in a well-ventilated area. Prevent vapour build up by providing adequate ventilation during and after use. May form explosive mixtures with air. Take action to prevent static discharges. Use non-sparking tools. All parts of the plant and equipment should be electrically bonded together and connected to earth. Electrical continuity should be checked at regular intervals. Antistatic clothing and footwear should be used. The vapour is heavier than air; beware of pits and confined spaces. Avoid all contact with substance. Do not ingest. If swallowed then seek immediate medical assistance. Do not breathe vapour. See Section: 8. Keep good industrial hygiene. Wash hands thoroughly after handling. Contaminated clothing should be thoroughly cleaned. Product may release Hydrogen Sulphide: A specific assessment of inhalation risks from the presence of hydrogen sulphide in tank headspaces, confined spaces, product residue, tank waste and waste water, and unintentional releases should be made to help determine controls appropriate to local circumstances. These controls may include: Segregation of areas, Access only to authorised persons, Permit to work systems, Confined space working procedures, Area H2S alarms, Personal H2S alarms, Personal escape sets, H2S awareness training.
7.2	Conditions for safe storage, including any incompatibilities	Light hydrocarbon vapours can build up in the headspace of containers. These can cause flammability / explosion hazards. Bund storage facilities to prevent soil and water pollution in the event of spillage. Keep only in original packaging.

Revision: 4.1 Date: 10.06.2019

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

		Keep containers properly sealed when not in use. Protect from sunlight. Containers of this material may be hazardous when empty since they retain
		product residue. Empty container may contain product residue which may result
		in flammable or explosive vapours inside the container.
	Storage temperature	Stable at ambient temperatures.
	Storage measures	Suitable containers: Stainless steel, Mild steel
		Do not store in: Synthetic materials
	Incompatible materials	Keep away from oxidising agents.
7.3	Specific end use(s)	See Section: 1.2 and/or Exposure Scenario.

### SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

- 8.1 Control parameters
- 8.1.1 Occupational Exposure Limits

No Occupational Exposure Limit assigned. Users are advised to consider national Occupational Exposure Limits or other equivalent values.

- 8.1.2 Biological limit value
- 8.1.3 PNECs and DNELs

Not established.

PNEC: Not established. Gasoline is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the environmental toxicity (HC5) of each group of components in the substance. These are used to estimate the environmental risk for the substance. Therefore individual environmental compartments PNECs are not available for this product.

Gasoline Derived No Effect Level	Oral	Inhalation	Dermal
Worker - Long Term - Systemic effects	-	1300 mg/m <sup>3</sup>	-
Worker - Long Term - Local effects	-	840 mg/m <sup>3</sup>	-
Worker - Acute - Local effects	-	1100 mg/m <sup>3</sup>	-
Consumer - Long Term - Systemic effects	-	1200 mg/m <sup>3</sup>	-
Consumer - Long Term - Local effects	-	180 mg/m <sup>3</sup>	-
Consumer - Acute - Local effects	-	640 mg/m <sup>3</sup>	-

#### 8.2 Exposure controls

8.2.2

#### 8.2.1 Appropriate engineering controls

protective equipment (PPE)

Individual protection measures, such as personal

Provide adequate ventilation, including appropriate local extraction if dusts, fumes or vapours are likely to be evolved. Store in a cool/low-temperature, well-ventilated (dry) place away from heat and ignition sources. Guarantee that the eye flushing systems and safety showers are located close to the working place.

Protective clothing should be selected specifically for the working place, depending on concentration and quantity of the hazardous substances handled. The resistance of the protective clothing to chemicals should be ascertained with the respective supplier.

Fuels are typically used, transferred and transported in closed systems. If exposure is likely (i.e. during sampling) the following advice may be appropriate. Keep good industrial hygiene. Always wash hands before smoking, eating and drinking. Do not eat, drink or smoke at the work place.

Refer to annexes for exposure scenarios detailing use specific exposure controls

Use eye protection according to EN 166, designed to protect against liquid splashes.

Eye/ face protection

Skin protection

**Hand protection:** Wear impervious gloves (EN374). Gloves should be changed regularly to avoid permeation problems. Breakthrough time of the glove material: refer to the information provided by the gloves' producer. Recommended: Nitrile rubber.

**Body protection:** Wear anti-static clothing and shoes. small scale: Wear suitable coveralls to prevent exposure to the skin.

#### Revision: 4.1 Date: 10.06.2019

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

large scale: Chemical protection suit.

Respiratory protection

When the product is heated /In case of inadequate ventilation wear respiratory protection. The use of a high efficiency filter (EN143) is recommended. Filter type A1

Closed system(s): Not normally required.

Not applicable.

Avoid release to the environment.

### Thermal hazards

### 8.2.3 Environmental Exposure Controls

## SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1	Information on basic physical and chemical properties	
	Appearance	Colourless liquid
	Odour	Hydrocarbon
	Odour threshold	Not established.
	рН	Not established.
	Melting point/freezing point	< - 60 °C
	Initial boiling point and boiling range	< 35 °C
	Flash point	< 0 °C
	Evaporation rate	Not established.
	Flammability (solid, gas)	Not applicable - Liquid
	Upper/lower flammability or explosive limits	Flammable Limits (Lower) (%v/v) 1
		Flammable Limits (Upper) (%v/v) 10
	Vapour pressure	4 - 240 kPa @ 37.8°C
	Vapour density	> 2
	Relative density	0.62 – 0.88 g/cm³ @ 15 °C
	Solubility(ies)	Immiscible with water.
	Partition coefficient: n-octanol/water	Not applicable. Substance is complex UVCB.
	Auto-ignition temperature	> 220 °C
	Decomposition Temperature	Not established.
	Viscosity	1 mm²/s @ 20 °C
	Explosive properties	Not explosive. (Vapour may create explosive atmosphere.)
	Oxidising properties	Not oxidising.

#### 9.2 Other information

### None known.

Reactivity	Stable under normal conditions. Reacts with - Strong oxidising agents
Chemical stability	Stable under normal conditions. Hazardous polymerisation will not occur.
	Product may release Hydrogen Sulphide.
Possibility of hazardous reactions	Extremely flammable liquid and vapour. May form explosive mixture with air.
	Vapours are heavier than air and may travel considerable distances to a source
	of ignition and flashback. Product may release Hydrogen Sulphide.
Conditions to avoid	Elevated temperature. Keep away from heat, hot surfaces, sparks, open flames
	and other ignition sources. No smoking. Keep away from direct sunlight.
Incompatible materials	Keep away from oxidising agents. Strong Acids and Alkalis.
Hazardous decomposition product(s)	A mixture of solid and liquid particulates and gases including unidentified
	organic and inorganic compounds. Decomposes in a fire giving off toxic fumes:
	COx, H2S, SOx,
	Chemical stability Possibility of hazardous reactions Conditions to avoid Incompatible materials

### SECTION 11: TOXICOLOGICAL INFORMATION

SECTION 10: STABILITY AND REACTIVITY

11.1 Information on toxicological effects

Acute toxicity - Ingestion

All test data taken from existing ECHA registrations for the substances mentioned.

Based upon the available data, the classification criteria are not met. LD50 > 5000 mg/kg bw/day (rat) (OECD 401)

Revision: 4.1 Date: 10.06.2019

#### ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

Acute toxicity - Inhalation		Based upon the available data, the classification criteria are not met. LC50 Vapour > 5600 mg/m <sup>3</sup> Air (rat) (OECD 403)
Acute toxicity - Skin Contact		Based upon the available data, the classification criteria are not met.
		LD50 > 2000 mg/kg bw/day (rabbit) (OECD 402)
Skin corrosion/irritation		Skin Irrit. 2; Causes skin irritation.
		Irritating to skin. (rabbit) (OECD 404)
Serious eye damage/irritation		Based upon the available data, the classification criteria are not met.
		Not irritating to eyes (rabbit) (OECD 405)
Respiratory or skin sensitization		Based upon the available data, the classification criteria are not met.
		Sensitisation (guinea pig) - Negative (OECD 406)
Germ cell mutagenicity		Muta. 1B; May cause genetic defects. Harmonised Classification.
		ECHA Registration Endpoint summary: According to EU CLP Classification (EC
		no. 1272/2008), there is a regulatory requirement to classify Gasoline and i
		naphtha streams as hazardous for this endpoint when they contain >0.1% benzene
Coroinogoniaity		Carc. 1B; May cause cancer. Harmonised Classification.
Carcinogenicity		ECHA Registration Endpoint summary: According to EU CLP Classification (EC
		no. 1272/2008), there is a regulatory requirement to classify Gasoline and
		naphtha streams as hazardous for this endpoint when they contain >0.1% !
		benzene
Reproductive toxicity		Repr. 2; Suspected of damaging fertility or the unborn child.
		ECHA Registration Endpoint summary According to EU CLP Classification (EC
		no. 1272/2008), there is a regulatory requirement to classify Gasoline and
		naphtha streams as hazardous for this endpoint when they contain >0.1%
		Toluene and/or n-hexane
STOT - single exposure		STOT SE 3; May cause drowsiness or dizziness.
		Weight of evidence approach
STOT - repeated exposure		Based upon the available data, the classification criteria are not met.
	Oral:	No adverse effect observed (rat) (Halder CA, et al. (1985))
	Inhalation:	No adverse effect observed (rat) (OECD 453)
		Chronic - Systemic effects NOAEC 1402 mg/m <sup>3</sup>
	Dermal:	No adverse effect observed. (mouse) (OECD TG 410)
Appiration beyond		Chronic - Systemic effects NOAEL 375 mg/kg bw/day
Aspiration hazard		Asp. Tox. 1; May be fatal if swallowed and enters airways. Harmonised Classification.
Other information		Viscosity: 1 mm <sup>2</sup> /s @ 20 °C None.

#### **SECTION 12: ECOLOGICAL INFORMATION** 12.1 Toxicity Aquatic Chronic 2; Toxic to aquatic life with long lasting effects. Short Term (acute): LL50 (Fish) (96hr) 10 mg/l (OCED 203) Long Term (Chronic): According to the EU CLP Regulation (EC No. 1272/2008) criteria, substances in the low boiling point naphtha category are classified as Chronic Category 2 (H411) for the environment based on acute invertebrate and alga toxicity. 12.2 Persistence and degradability Readily biodegradable. (OECD 301F) Substance is complex UVCB. The BCF (fish) of this substance components is 12.3 **Bioaccumulative potential** well below the criteria for bioaccumulation. Therefore, this substance is not considered as bioaccumulative substance. (ECHA registration dossier: PBT assessment 2) 12.4 Mobility in soil The product is predicted to have low mobility in soil. Immiscible with water. Results of PBT and vPvB assessment 12.5 Substance is complex UVCB. This substance does not contain PBT constituents included in the SVHC candidate list at concentrations above 0.1%. 12.6 Other adverse effects None known.

### **SECTION 13: DISPOSAL CONSIDERATIONS**

13.1 Waste treatment methods

11.2

Dispose of this material and its container as hazardous waste. Do not empty into drains, dispose of this material and its container at hazardous or special waste collection point. Disposal should be in accordance with local, state or national legislation. Containers of this material may be hazardous when empty since they

Revision: 4.1 Date: 10.06.2019

ACCORDING TO EC-REGULATIONS 1907/2006 (REACH), 1272/2008 (CLP) & 2015/830

retain product residue. Containers must not be punctured or destroyed by burning, even when empty. Allocation of a waste code number, according to the European Waste Catalogue, should be carried out in agreement with the regional waste disposal company. Waste code: 13 07 01

### SECTION 14: TRANSPORT INFORMATION

### 3.2 Environmental exposure prediction

Exposure assessment (method/calculation model)

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

Gasoline is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the PEC of each group of components in the substance. These are used to estimate the environmental risk for the substance As the model assumes fractionation before entering the environment, the PEC is not of the substance as manufactured but is a some of the constituents expected to be present in the environmental compartment.

Environmental exposure	STP	freshwater	marine water	Soil	freshwater sediment	marine sediment
Predicted Environmental Exposure (PEC)	1.44 mg/L	5.06E-03 mg/L	1.45E-04 mg/L	1,68E-4 mg/kg ww	9.88E-03 mg/kg ww	9.88E-04 mg/kg ww
Risk characterisation ratio (RCR)	1.64E-03	2.74E-02	7.50E-04	7.99E-05	9.98E-03	9.93E-03

Human exposure prediction:

Route of Exposure	Exposure (µg/kg <sup>-1</sup> day <sup>-1</sup> )	Risk characterisation ratio (RCR)
Oral	0.36	3.62E-03

General measures applicable to all activities

Assumes a good basic standard of occupational hygiene is implemented. Assumes activities are at ambient temperature (unless stated differently). General measures (skin irritants)

Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent/minimise exposures and to report any skin problems that may develop.

#### General measures (carcinogens)

Consider technical advances and process upgrades (including automation) for the elimination of releases. minimise exposure using measures such as closed systems, dedicated facilities and suitable general/local exhaust ventilation. Drain down systems and clear transfer lines prior to breaking containment. Clean/flush equipment, where possible, prior to maintenance Where there is potential for exposure: restrict access to authorised persons; provide specific activity training to operators to minimise exposures; wear suitable gloves and coveralls to prevent skin contamination; wear respiratory protection when its use is identified for certain contributing scenario; clear up spills immediately and dispose of waste safely. Ensure safe systems of work or equivalent arrangements are in place to manage risks. Regularly inspect, test and maintain all control measures. Consider the need for risk based health surveillance.

## 3.2 Environmental exposure prediction

Exposure assessment (method/calculation model)

The Hydrocarbon Block Method has been used to calculate environmental exposure with the Petrorisk model.

Gasoline is a hydrocarbon UVCB. The hydrocarbon block method is used in PETRORISK to calculate the PEC of each group of components in the substance. These are used to estimate the environmental risk for the substance As the model assumes fractionation before entering the environment, the PEC is not of the substance as manufactured but is a some of the constituents expected to be present in the environmental compartment.

Environmental exposure	STP	freshwater	marine water	Soil	freshwater sediment	marine sediment
Predicted Environmental Exposure (PEC)	6.39E-01 mg/L	6.40E-02 mg/L	6.40E-02 mg/L	5.07E-03 mg/kg ww	4.37E-01 mg/kg ww	4.37E-02 mg/kg ww
Risk characterisation ratio (RCR)	7.24E-02	3.32E-01	3.32E-02	1.52E-02	4.41E-01	4.41E-02
